

# DIN EN 13906-2:2013-09 (E)

## Cylindrical helical springs made from round wire and bar - Calculation and design - Part 2: Extension springs

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
1	Scope .....	4
2	Normative references .....	4
3	Terms and definitions, symbols, units and abbreviated terms .....	4
3.1	Terms and definitions .....	4
3.2	Symbols, units and abbreviated terms .....	5
4	Theoretical extension spring diagram .....	6
5	Types of loading .....	7
5.1	General .....	7
5.2	Static and/or quasi-static loading .....	7
5.3	Dynamic loading .....	7
6	Stress correction factor k .....	8
7	Initial tension force $F_0$ .....	9
8	Material property values for the calculation of springs .....	10
9	Calculation formulae .....	10
9.1	General .....	10
9.2	Spring work .....	10
9.3	Spring Force .....	11
9.4	Spring deflection .....	11
9.5	Spring rate .....	11
9.6	Torsional stresses .....	11
9.7	Nominal diameter of wire or bar .....	11
9.8	Number of active coils .....	11
9.9	Total number of coils .....	11
9.10	Initial tension force .....	12
10	Permissible torsional stress under static or quasi-static loading .....	12
10.1	General .....	12
10.2	Permissible torsional stress $\sigma_{zul}$ for cold coiled springs .....	12
10.3	Permissible torsional stress $\sigma_{zul}$ for hot coiled springs .....	12
10.4	Initial tension torsional stress $\sigma_0$ .....	12
11	Calculation of extension springs for dynamic loading .....	13
Annex A (informative) Types of spring ends .....		14
Bibliography .....		18
