

ISO 23269-1:2008-02 (E)

Ships and marine technology - Breathing apparatus for ships - Part 1: Emergency escape breathing devices (EEBD) for shipboard use

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	General	2
4.1	System design and performance	2
4.2	Facepiece and hood requirements	3
5	Resistance to environmental damage	4
5.1	General	4
5.2	High temperature, high humidity test	4
5.3	Temperature cycling test	4
5.4	Resonance and vibration tests	4
5.5	Drop and shock tests	5
5.6	Corrosion resistance test	5
6	Performance requirements	6
6.1	Rated working duration	6
6.2	Overloading	6
6.3	Measurement of inhaled air/gas	6
6.4	Breathing resistance	6
6.5	Surface temperature (for closed circuit oxygen type only)	7
6.6	Oxygen supply (for closed circuit oxygen type only)	7
6.7	Leak-tightness test (for ready-for-use apparatus)	7
6.8	Total inward leakage test	7
6.9	Pressure tests	7
6.10	Flammability	7
6.11	Opening pressure of the relief valve (for closed circuit oxygen type only)	9
6.12	Effective volume of the breathing bag (for closed circuit oxygen type only)	9
6.13	Materials and seams of hood and breathing bag	9
6.14	Materials for visor or transparent parts of non-flexible materials	9
7	Operational tests	9
7.1	Donning test	9
7.2	Practical performance test	10
8	Instructions for use	10
9	Marking	10
Annex A (normative)	Breathing machine schematic diagrams	11
Annex B (normative)	Practical performance test procedure	15
