Ophthalmic optics and instruments - Reporting aberrations of the human eye

Contents

Page

Foreword iv

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Coordinate system 5

5 Representation of wavefront data 6
5.1 Representation of wavefront data with the use of Zernike polynomial function coefficients 6
5.2 Representation of wavefront data in the form of wavefront gradient fields or wavefront error function values 9
5.3 Gradient fit error 10

6 Presentation of data representing the aberrations of the human eye 10
6.1 General 10
6.2 Aberration data presented in the form of normalized Zernike coefficients 11
6.3 Aberration data presented in the form of normalized Zernike coefficients given in magnitude/axis form 11
6.4 Aberration data presented in the form of topographical maps 12
6.5 Presentation of pooled aberration data 14

Annex A (informative) Methods of generating Zernike coefficients 15

Annex B (informative) Conversion of Zernike coefficients to account for differing aperture sizes, decentration and coordinate system rotation 17

Annex C (informative) Conversion between Zernike coefficients represented in different systems of notation 25

Annex D (informative) Computer algorithm to generate partial derivative weighting matrices for un-normalized Zernike polynomial functions 27

Annex E (informative) Table of normalized Zernike polynomial functions (to 6th radial order) 29
