Foreword v

1 Scope 1

2 Normative references 1

3 General requirements for the test conditions and preparation of tests 1

4 Test method for measuring magnification and difference in magnification 2
4.1 General 2
4.2 Requirements for the test arrangements and their principal parts 3
4.3 Sequence of measurements 5
4.4 Assessment of results 5

5 Test method for measuring night-vision device gain 6
5.1 General 6
5.2 Requirements for the test arrangement and principal parts 6
5.3 Sequence of measurements 7
5.4 Assessment of results 7

6 Test method for measuring the angular field of view in object space 7
6.1 General 7
6.2 Requirements for the test arrangement and principal parts 7
6.3 Sequence of measurements 8
6.4 Assessment of results 8

7 Test method for measuring exit pupil diameter and eye relief 9
7.1 General 9
7.2 Requirements for the test arrangement and its principal parts 9
7.3 Sequence of measurements 10

8 Test method for measuring the error of zero-position of the dioptre scale 10
8.1 General 10
8.2 Requirements for the test arrangement and its principal parts 10
8.3 Sequence of measurements 11
8.4 Assessment of results 11

9 Test method for measuring the angle of image rotation around the optical axis relative to the object and the difference of image rotation angles 12
9.1 General 12
9.2 Requirements of the test arrangement and its principal parts 12
9.3 Sequence of measurements 13
9.4 Assessment of results 13

10 Test method for measuring non-parallelism of the axes of bundles of rays emerging from the eyepieces of the night-vision device 13
10.1 General 13
10.2 Requirements of the test arrangement and its principal parts 13
10.3 Sequence of measurements 15
10.4 Assessment of results 15

11 Test method for measuring the limit of resolution 15
11.1 General 15
11.2 Requirements for the test arrangement and its principal parts 15
11.3 Sequence of measurements 16
11.4 Assessment of results 16

12 Test method for measuring working resolution and for determining range of vision 16
12.1 General 16
12.2 Requirements for the test arrangement and its principal parts 17
12.3 Sequence of measurements 17
12.4 Assessment of results 18

13 Test method for measuring the close distance of observation 19
13.1 General 19
13.2 Requirements for the test arrangement and its principal parts 19
13.3 Sequence of measurements 20
13.4 Assessment of results 20

14 Test method for imperfections in the field of view 20
14.1 General 20
14.2 Requirements for the test arrangement and its principal parts 20
14.3 Sequence of measurements 21
14.4 Assessment of results 22

15 Test method for measuring the continuous work time of a night-vision device 22
15.1 General 22
15.2 Requirements for the test arrangement and its principal parts 22
15.3 Sequence of measurements 22
15.4 Assessment of results 22
