Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Requirements 2
4.1 Transparency and colour 2
4.2 Non-flatness (waviness) and non-parallelism 2
4.3 Durability 3
4.4 Surface quality and inclusions 3
4.5 Edge finish 3
4.6 Cleanliness and cloudiness 3
4.7 Adhesion 3
4.8 Residual stress/birefringence 3

5 Sampling 3
5.1 General 3
5.3 Drawing of samples and units inspection 4

6 Test methods 4
6.1 General 4
6.2 Package suitability 4
6.3 Adhesion 5
6.4 Cleanliness and cloudiness 5
6.5 Surface quality and inclusions 5
6.6 Transparency and colour 6
6.7 Edge finish 6
6.8 Non-flatness (waviness) and non-parallelism 6
6.9 Durability -- Chemical durability of surface and resistance to atmospheric attack (Solubility) 6
6.10 Residual stress/birefringence 7

7 Marking/labelling 7

8 Packaging 7

Annex A (normative) Sample size code letters and single sampling plans for normal inspection 8
