

ISO 8255-2:2013-09 (E)

Microscopes - Cover glasses - Part 2: Quality of materials, standards of finish and mode of packaging

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Requirements	2
4.1	Transparency and colour	2
4.2	Non-flatness (waviness) and non-parallelism	2
4.3	Durability	3
4.4	Surface quality and inclusions	3
4.5	Edge finish	3
4.6	Cleanliness and cloudiness	3
4.7	Adhesion	3
4.8	Residual stress/birefringence	3
5	Sampling	3
5.1	General	3
5.3	Drawing of samples and units inspection	4
6	Test methods	4
6.1	General	4
6.2	Package suitability	4
6.3	Adhesion	5
6.4	Cleanliness and cloudiness	5
6.5	Surface quality and inclusions	5
6.6	Transparency and colour	6
6.7	Edge finish	6
6.8	Non-flatness (waviness) and non-parallelism	6
6.9	Durability -- Chemical durability of surface and resistance to atmospheric attack (Solubility)	6
6.10	Residual stress/birefringence	7
7	Marking/labelling	7
8	Packaging	7
Annex A (normative) Sample size code letters and single sampling plans for normal inspection		8
Bibliography		10
