## Microscopes - Cover glasses - Part 2: Quality of materials, standards of finish and mode of packaging

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Requirements .....	2
4.1	Transparency and colour .....	2
4.2	Non-flatness (waviness) and non-parallelism .....	2
4.3	Durability .....	3
4.4	Surface quality and inclusions .....	3
4.5	Edge finish .....	3
4.6	Cleanliness and cloudiness .....	3
4.7	Adhesion .....	3
4.8	Residual stress/birefringence .....	3
5	Sampling .....	3
5.1	General .....	3
5.3	Drawing of samples and units inspection .....	4
6	Test methods .....	4
6.1	General .....	4
6.2	Package suitability .....	4
6.3	Adhesion .....	5
6.4	Cleanliness and cloudiness .....	5
6.5	Surface quality and inclusions .....	5
6.6	Transparency and colour .....	6
6.7	Edge finish .....	6
6.8	Non-flatness (waviness) and non-parallelism .....	6
6.9	Durability -- Chemical durability of surface and resistance to atmospheric attack (Solubility) .....	6
6.10	Residual stress/birefringence .....	7
7	Marking/labelling .....	7
8	Packaging .....	7
Annex A (normative) Sample size code letters and single sampling plans for normal inspection .....		8
Bibliography .....		10
