ISO 8598-1:2014-09 (E)

Optics and optical instruments - Focimeters - Part 1: General purpose instruments

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Technical requirements for general purpose focimeters 3

5 Metrological requirements 5
5.1 General 5
5.2 Reference wavelength 5
5.3 Performance requirement 5

6 Test procedures 8
6.1 General 8
6.2 Checking the indication errors 8
6.3 Checking the axis marker for the optical centre of lens 8
6.4 Checking the alignment of the axis marker 9
6.5 Checking the adjusting rail 9
6.6 Checking the non-symmetric error for automated focimeters 9
6.7 Checking the repeatability of vertex power measurement for automated focimeters 10
6.8 Checking for the centration error 10
6.9 Checking the capability of focimeters to measure tinted lenses 10
6.10 Checking the astigmatic axis repeatability for low-powered cylinder lens 10
6.11 Special procedures for eyepiece focimeters 11
6.12 Criterion for image focusing in manual focusing focimeters 11

7 Marking 11
7.2 General information to be supplied by the manufacturer 11
7.3 Additional information to be supplied by the manufacturer 12

Annex A (informative) Use of correction values when measuring spectacle lenses 13

Annex B (informative) Example for evaluation of uncertainty of measurement for automated focimeters for general use 18

Annex C (normative)Specificationsofspecialreferencelenses 24

Annex D (informative) Information for users on the performance of general purpose focimeters
