

DIN EN ISO 12311:2015-06 (E)

Personal protective equipment - Test methods for sunglasses and related eyewear (ISO 12311:2013, Corrected version 2014-08-15)

Contents	Page
Foreword	4
1 Scope	5
2 Normative references	5
3 Terms and definitions	5
4 Prerequisites	5
5 General test requirements	6
6 Test methods for assessing the construction and materials	6
6.1 Prior assessment of construction, marking and information	6
6.2 Test method for assessment of filter material and surface quality	6
7 Test methods for measuring spectrophotometric properties	7
7.1 Measurement of spectral transmittance ()	7
7.2 Measurement of uniformity of luminous transmittance	9
7.3 Calculation of ultraviolet transmittance	11
7.4 Calculation of solar blue-light transmittance sb	13
7.5 Calculation of solar IR transmittance SIR	13
7.6 Measurement of absolute spectral reflectance ()	13
7.7 Absolute luminous reflectance V	14
7.8 Calculation of relative visual attenuation quotient for signal light detection Qsignal	15
7.9 Wide angle scatter	15
7.10 Polarizing filters	18
7.11 Photochromic filters	21
8 Test methods for measuring optical properties	23
8.1 Test method for spherical, astigmatic and prismatic refractive powers	23
8.2 Test method for the prism imbalance of complete sunglasses or filters covering both eyes	27
8.3 Test method for local variations in refractive power	29
9 Test methods for mechanical properties	34
9.1 Test method for minimum robustness of filters	34
9.2 Test method for impact resistance of filters, strength level 1	37
9.3 Test method for impact resistance of sunglasses, strength level 1	39
9.4 Test method for impact resistance of sunglasses, strength level 2	40
9.5 Test method for impact resistance of sunglasses, strength level 3	41
9.6 Test method for frame deformation and filter retention	43
9.7 Test method for increased endurance of sunglasses	466
9.8 Test method for resistance to solar radiation	50
9.9 Test method for resistance to ignition	52
9.10 Test for resistance to perspiration of the sunglass frame	52
Annex A (normative) Application of uncertainty of measurement	56
Annex B (informative) Sources of uncertainty in spectrophotometry and their estimation and control	58

Annex C (informative) Definitions in summations form	65
Annex D (normative) Product of the energy distribution of Standard Illuminant D65 as specified in ISO 11664-2 and the spectral visibility function of the average human eye for daylight vision as specified in ISO 11664-1	69
Annex E (normative) Spectral functions for the calculation of solar UV and solar blue light transmittance values	70
Annex F (normative) Spectral distribution of solar irradiance in the infrared spectrum for the calculation of the solar infrared transmittance[7]	72
Annex G (normative) Reference test headforms	74
Annex H (normative) Spectral distribution of radiation in incandescent signal lights weighted by the sensitivity of the human eye V()	76
Annex I (informative) Spectral distribution of radiation in LED signal lights weighted by the sensitivity of the human eye V()	76
Annex J (normative) Long wavelength pass filter	82
Annex K (informative) Method of variable distance for the calibration of the telescope	86
Annex L (normative) Method to correct transmittance for variations in thickness of the filter	88
Bibliography	90
Annex ZA Relationship between this European Standard and the Essential Requirements of EU Directive 89/686/EEC 89 (informative)
