

ISO 10110-5:2015-08 (E)

Optics and photonics - Preparation of drawings for optical elements and systems - Part 5: Surface form tolerances

Contents		Page
Foreword		iv
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Specification of tolerances for surface form deviation	2
4.1	General	2
4.2	Units	2
4.3	Wavelength	3
5	Indication in drawings	3
5.1	General	3
5.2	Structure of the indication based on code number	3
5.2.1	General	3
5.2.2	Code number	3
5.2.3	Basic forms	4
5.2.4	Additional forms	6
5.2.5	Area	8
5.2.6	Location	8
5.3	Structure of the indication in tabular form	9
5.4	Specification of deviations in sets of Zernike coefficients in tabular form	9
6	Examples of tolerance indications	10
6.1	Examples for indication based on code number	10
6.2	Examples for indication based on a table	12
6.2.1	Aspheric surface	12
6.2.2	XY - polynomials described surface (Cartesian coordinates)	13
6.2.3	-polynomials described surface (polar coordinates)	13
6.2.4	Example for specification of deviations in sets of Zernike coefficients in tabular form	13
Annex A (informative)	Relationship between power deviation tolerance and radius of curvature tolerance	15
	nomenclature, functions, and values	16
	Bibliography	20
