

ISO/TS 16975-2:2016-06 (E)

Respiratory protective devices - Selection, use and maintenance - Part 2: Condensed guidance to establishing and implementing a respiratory protective device programme

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Basic information	2
4.1 General	2
4.2 Risk assessment	2
4.3 Use of assigned protection factors (APF) and ISO protection levels (PL)	2
4.4 Types and classes of RPD	3
4.4.1 Types of RPD	3
4.4.2 Classes of RPD	3
5 RPD programme elements	3
6 Selection procedure	4
6.1 General	4
6.2 Step 1: Organization information	4
6.3 Step 2: Description of the task	4
6.4 Step 3: Define the hazards	4
6.5 Step 4: Determination of the protection class	5
6.6 Step 5: Work rate assessment	5
6.7 Step 6: Filter identification	5
6.8 Step 7: Supplied breathable gas RPD capacity	5
6.9 Step 8: Task related factors	5
6.10 Step 9: Wearer related factors	5
6.11 Step 10: Final selection	6
7 Training of the RPD wearer	7
8 Using RPD	7
8.1 General	7
8.2 Using Filtering RPD	8
8.3 Replacing filters	8
8.4 Using supplied breathable gas RPD	8
9 Management of the RPD programme	8
10 Records	9
Annex A (normative) Respiratory protective device (RPD) selection process and record	10
