ISO/TR 20811:2017-08 (E)

Optics and photonics - Lasers and laser-related equipment - Laser-induced molecular contamination testing

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols and abbreviated terms 2

5 Test method 2
5.1 Test setup 2
5.1.1 Vacuum chamber 2
5.1.2 Laser source and optical beam line 3
5.2 Setup for data acquisition 3
5.2.1 Beam profile monitoring 3
5.2.2 Measurement of pulse energy and determination of transmission 3
5.2.3 Laser-induced fluorescence monitoring 4
5.3 Test preparation 4
5.3.1 Bakeout 4
5.3.2 Pretreatment of optical samples 4
5.3.3 Blank test 4
5.4 LIMC test 5
5.4.1 Test parameters 5
5.4.2 Individual steps for LIMC test 5
5.5 Evaluation of test results 6
