

DIN EN 14594:2018-07 (E)

Respiratory protective devices - Continuous flow compressed air line breathing devices - Requirements, testing and marking

Contents		Page
European foreword		5
1	Scope	6
2	Normative references	6
3	Terms, description and symbols	7
3.1	Terms	7
3.2	Description	8
3.3	Symbols	8
4	Classification	9
5	Requirements	9
5.1	General	9
5.2	Nominal values and tolerances	9
5.3	Ergonomics	9
5.4	Design	10
5.5	Materials	10
5.6	Practical performance	10
5.7	Connections	10
5.7.1	General	10
5.7.2	Couplings	11
5.7.3	Strength of breathing hose connections	11
5.7.4	Connection between RPD and mask	11
5.7.5	Connection between RPD and hood, helmet or suit	11
5.7.6	Unacceptable connections	11
5.8	Body harness or belt	11
5.9	Pre-conditioning	11
5.10	Flammability	12
5.11	Mobile compressed air supply systems, if applicable	12
5.11.1	General	12
5.11.2	Pressure reducer	12
5.11.3	Pressure reducer relief valve	12
5.12	Warning devices for compressed air supply systems	13
5.12.1	General	13
5.12.2	Audible warning device	13
5.13	Compressed air supply tube	13
5.13.1	Resistance to kinking	13
5.13.2	Resistance to collapse	14
5.13.3	Strength	14
5.13.4	Flexibility	14
5.13.5	Heat resistance	14
5.13.6	Electrostatic properties	14
5.13.7	Couplings	14
5.13.8	Resistance to pressure	14
5.13.9	Flammability	14
5.13.10	Working length	15
5.14	Breathing hose	15
5.14.1	Resistance to kinking	15

5.14.2	Resistance to collapse	15
5.15	Air flow rates	15
5.16	Adjustable parts	15
5.17	Facepieces	15
5.17.1	Full face mask or half masks	15
5.17.2	Hood, helmet or suit	16
5.18	Inward leakage	17
5.19	Breathing resistance	18
5.19.1	RPD with full face mask/half mask	18
5.19.2	RPD incorporating a hood/helmet/suit	18
5.20	Carbon dioxide content of inhalation air	18
5.20.1	Air supply on	18
5.20.2	Air supply off	18
5.21	Leaktightness	18
5.22	Checking and warning facilities	19
5.23	Resistance to abrasion	19
6	Testing	19
6.1	General	19
6.2	Inspection	20
6.3	Practical performance test	21
6.3.1	General	21
6.3.2	Preparation of RPD to be tested	21
6.3.3	Test conditions	21
6.3.4	Work simulation test	21
6.3.5	Information to be recorded	22
6.3.6	Practical performance tests at low temperature	22
6.4	Strength of breathing hose connections	23
6.5	Resistance to collapse of breathing hose	23
6.5.1	Principle	23
6.5.2	Apparatus	23
6.5.3	Procedure	24
6.6	Strength of compressed air supply tube, body harness and couplings	24
6.7	Pre-conditioning	25
6.7.1	Procedure	25
6.7.2	Laboratory test at - 15 °C	25
6.8	Flammability	25
6.9	Pressure reducer relief valve	26
6.10	Resistance to kinking of compressed air supply tube	26
6.10.1	Corner kinking for Class A RPD	26
6.10.2	Coil kinking for Class B RPD	27
6.11	Resistance to collapse of compressed air supply tube (Class A and Class B)	30
6.11.1	Principle	30
6.11.2	Apparatus	30
6.11.3	Procedure	30
6.12	Heat resistance of compressed air supply tube	30
6.13	Carbon dioxide content of the inhalation air	31
6.14	Inward leakage	31
6.14.1	Inward leakage test method	31
6.14.2	Prerequisites for inward leakage determination	31
6.15	Warning device	33
6.15.1	Apparatus	33
6.15.2	Procedure	33
6.15.3	Report	33
6.16	Mechanical resistance of lens(es) or visor(s) (hood/helmet/suit)	36
6.17	Breathing resistance	36
6.17.1	General	36
6.17.2	Inhalation resistance	36
6.17.3	Exhalation resistance	36
6.18	Sound level measurement inside the hood/helmet/suit	37
6.19	Strength of attachment of exhalation valve (hood/helmet/suit)	37

6.20	Air supply flow rate	38
6.20.1	Principle	38
6.20.2	Apparatus	38
6.20.3	Procedure	38
6.21	Resistance to abrasion of protective clothing	39
6.22	Effective mass supported by the facepiece	39
6.23	Leaktightness	40
7	Marking	40
8	Information supplied by the manufacturer	41
Annex ZA (informative) Relationship between this European Standard and the essential health and safety requirements of Regulation 2016/425/EU [2016 OJ L81] aimed to be covered		43
