ISO 4007:2018 (E)

Personal protective equipment — Eye and face protection — Vocabulary

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

- 3.1 Risks and hazards
- 3.2 Optical radiation
- 3.3 Sources of non-ionizing radiation
- 3.4 Radiometry and photometry
- 3.5 General terms
- 3.5.1 Types and components of eye and face protectors
- 3.5.2 Geometrical properties of eye and face protection
- 3.5.3 Terms relating to the non-lens part of protectors
- 3.5.4 Welding protectors2 2 Terms relating to the filtering properties of welding filters are given in 3.10.3.
- 3.5.5 Secondary lenses for welding protectors
- 3.5.6 Mesh protectors
- 3.5.7 Protection from short circuit electric arc
- 3.6 Optical materials
- 3.7 Optical properties of components and lenses3 3 The word "lens" is not always italicized in this subclause because the term and definition apply to lenses in general, not specifically to lenses in eye protectors.
- 3.8 Optical properties of lenses, excluding transmittance
- 3.9 Wearer characteristics
- 3.10 Filters, absorption, transmission and reflection
- 3.10.1 General terms
- 3.10.2 Polarized radiation and polarizing filters
- 3.10.3 Welding filters
- 3.11 Test equipment
