

# ISO 10553:2018 (E)

## Horology — Procedure for evaluating the accuracy of quartz watches

---

### Contents

	Foreword
1	Scope
2	Normative references
3	Terms and definitions
4	Symbols and units
5	Practical factors affecting accuracy
5.1	General
5.2	Accuracy
5.3	Influence of temperature on accuracy
5.4	Accidents or abnormal environment
6	Types of measurement
7	Test methods
7.1	General test conditions
7.2	Ageing test programme
7.3	Temperature simulation test programme
7.4	Uncertainty of measurement
8	Calculation of accuracy
8.1	General
8.2	Calculation of the effect of ageing on accuracy
9	Relationship between the calculated accuracy and the accuracy classification indicated
10	Indication of the accuracy classification
11	Reliability
Annex A	(normative) Statistical evaluation of accuracy
A.1	Field of application
A.2	Explanation of symbols
A.2.1	Accuracy by lot
A.2.2	Average values and standard deviations of VT(i) and VV(i)
A.3	Test methods
A.4	Accuracy evaluation method by lot
A.4.1	Normal distribution
A.4.2	Abnormal distribution
A.5	Relationship between the calculated accuracy and the accuracy classification indicated
A.6	Indications
Annex B	(informative) Evaluation of coefficients $\alpha$ and $c$ from the differences of rates
Annex C	(informative) Reliability
