ISO 13666:2019 (E)

Ophthalmic optics — Spectacle lenses — Vocabulary

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

- 3.1 Basic optics
- 3.2 Lenses and their dispensing
- 3.3 Lens materials
- 3.4 Lens surfaces
- 3.5 Classification according to function
- 3.6 Classification according to form
- 3.7 Classification according to type of lens
- 3.8 Classification according to state of manufacture
- 3.9 Measurement of dioptric properties of lenses
- 3.10 Focal properties
- 3.11 Prismatic properties
- 3.12 Spherical-power lenses
- 3.13 Astigmatic-power lenses
- 3.14 Lenticular lenses
- 3.15 General descriptive terms for multifocal and power-variation lenses
- 3.16 Optical centration and focal properties of multifocal and power-variation lenses
- 3.17 Transmittance, reflectance and polarization
- 3.18 Coatings

Annex A (informative) Spectral weighting functions and spectral distributions
