Foreword iv

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Accuracy of testing 1

5 Test conditions 1
5.1 Total visual magnification (MTOT VIS) 1
5.2 Difference in total visual magnification between left and right optical systems 2
5.3 Difference in axes between left and right optical systems 2
5.4 Difference in the centres of the image fields between left and right optical systems 2
5.5 Difference in imaging rotations between right and left images 2
5.6 Axial shift of object plane by magnification change 2
5.7 Lateral shift of image plane by magnification change 2
5.8 Focus difference between left and right optical systems 2
5.9 Resolution for the highest magnification at the centre of the field 2
5.10 Difference in exit pupil heights between left and right optical systems 2
5.11 Minimum range for interpupillary distance 2
5.12 Calibration error if a dioptre scale is used 2
5.13 Minimum eyepiece dioptre adjustment range 2

6 Test methods 3
6.1 Apparatus 3
6.2 Apparatus configuration 4
6.3 Test procedures 4
