

ISO 12609-1:2021-10 (E)

Eye and face protection against intense light sources used on humans and animals for cosmetic and medical applications - Part 1: Specification for products

Contents		Page
Foreword		iv
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Classes of ILS eye protectors	2
5	General requirements for ILS eye protectors	2
5.1	Ambient temperatures	2
5.2	Physiological compatibility	2
5.3	Construction and adjustment	3
5.4	Cleaning and/or disinfection	3
5.5	Headform(s)	3
5.6	Mandatory and optional requirements	3
6	Transmittance	3
6.1	General	3
6.2	Luminous and spectral transmittance for F-scale numbers	4
6.3	Luminous and spectral transmittance for B-scale numbers	4
6.4	Uniformity of luminous transmittance and transmittance matching	5
7	Colour neutrality (optional requirement)	5
8	ILS eye protectors with autodarkening filters	5
8.1	General	5
8.2	Transmittance	6
8.3	Angular dependence of luminous transmittance	6
8.4	Switching time	6
9	Construction of ILS eye protectors	6
9.1	Area to be protected from ILS radiation	6
9.2	Frames and lateral protection	8
9.3	Material and surface quality	8
9.4	Field of view	8
9.5	Optical properties	8
9.5.1	Spherical and cylindrical power	8
9.5.2	Spatial deviation	9
9.5.3	Prismatic power of unmounted plano filters covering one eye	9
9.5.4	Prism imbalance for mounted filters and one-piece protectors	9
9.5.5	Narrow angle scatter	9
9.6	Resistance to ignition	9
9.7	Resistance to UV radiation	9
9.8	Resistance to thermal exposure	10
9.9	Basic impact level of complete ILS eye protectors	10
9.9.1	Complete protector	10
9.9.2	Failure criteria	10
9.9.3	ILS eye protectors with prescription inserts to carry corrective lenses	11

10	Marking	11
10.1	General	11
10.2	Mandatory markings	11
11	Information to be supplied by the manufacturer	12
	Bibliography	13
