DIN EN ISO 13696:2022-11 (E)

Optics and photonics - Test method for total scattering by optical components (ISO 1369 6:2022)

Contents

Page

European foreword ... **3**

Foreword ... **4**

Introduction ... **6**

1 Scope ... **7**

2 Normative references ... **7**

3 Terms, definitions and symbols ... **7**
3.1 Terms and definitions ... 7
3.2 Symbols and units of measure ... 9

4 Test method ... **9**
4.1 Principle ... 9
4.2 Measurement arrangement and test equipment ... 9
4.2.1 General ... 9
4.2.2 Radiation source ... 10
4.2.3 Beam preparation system ... 10
4.2.4 Integrating sphere ... 11
4.2.5 Detection system ... 12
4.2.6 Specimen holder ... 12
4.3 Arrangement with high sensitivity ... 12
4.4 Preparation of specimens ... 13

5 Procedure ... **13**
5.1 General ... 13
5.2 Alignment procedure ... 14
5.2.1 General ... 14
5.2.2 Alignment of the beam ... 14
5.2.3 Alignment of the specimen ... 14
5.3 Measurement procedure ... 14

6 Evaluation ... **15**
6.1 Determination of the total scattering value ... 15
6.2 Error budget ... 18

7 Test report ... **18**

Annex A (informative) **Set-up with a Coblentz hemisphere** ... **20**

Annex B (informative) **Example of test report** ... **23**

Annex C (informative) **Statistical evaluation example** ... **27**

Annex D (informative) **Example for selection of spacing** ... **32**

Annex E (informative) **Alternative method for calibrating total scatter measurements using a calcium fluoride diffuser disk** ... **35**

Bibliography ... **37**
