European foreword 3

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Termsanddefinitions 7

4 General requirements for the clinical investigation 9
4.1 Good clinical practice 9
4.2 General 9
4.3 Reference method 10
4.3.1 Reference invasive blood pressure monitoring equipment 10
4.3.2 Subject requirements 10
4.3.3 Blood pressure distribution 12
4.3.4 Arterial reference site 13
4.4 Lateral difference 14
4.4.1 General 14
4.4.2 Sequential procedure 15
4.4.3 Simultaneous procedure 15
4.4.4 Application of lateral difference 16
4.5 Statistical considerations 16
4.5.1 General 16
4.5.2 Intra-class correlation coefficient and number of independent measurements 17
4.5.3 Procedure to derive the number of subjects and number of repeated paired measurements per subject 17

5 Methods for clinical investigation 18
5.1 Method for the accuracy of blood pressure determination 18
5.1.1 General 18
5.1.2 Procedure 18
5.1.3 Data analysis 18
5.1.4 Acceptance criteria 19
5.2 Method for stability 21
5.2.1 General 21
5.2.2 Procedure 22
5.2.3 Data analysis 22
5.2.4 Acceptance criteria 24
5.3 Method for blood pressure changes 24
5.3.1 Change evaluation interval 24
5.3.2 General 25
5.3.3 Procedure 25
5.3.4 Data analysis 25
5.3.5 Acceptance criteria 27

Annex A (informative) Rationale and guidance 28
