## Optics and photonics - Test methods for surface imperfections of optical elements - Part 2: Machine vision

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Symbols .....	2
5	Considerations for machine vision systems applied to surface imperfection inspection of optics .....	2
5.1	Evaluation limits .....	2
5.2	Sample preparation .....	2
5.3	Illumination configuration .....	2
6	Dimensional inspection using machine vision (IMVD) .....	3
6.1	Dimensional resolution and accuracy considerations .....	3
6.2	Brightness and sensitivity .....	4
6.3	Verifying dimensional inspection system performance .....	4
7	Visibility inspection using machine vision (IMVV) .....	5
7.1	Visibility evaluation limit .....	5
7.1.1	System resolution considerations .....	5
7.2	Illumination configuration .....	5
7.3	Brightness and grades .....	6
7.4	Verifying visibility system performance .....	6
8	Repeatability, reproducibility and fidelity in the context of optics imperfections .....	7
8.1	Evaluation repeatability .....	7
8.2	Reproducibility .....	8
8.3	Fidelity .....	8
Annex A (informative)	Relation between precision and classification error in dimensional inspections using machine vision .....	9
Bibliography .....		11
