European foreword ... 5

[A1] European foreword to Amendment A1 [A1] ... 7

Annex ZA (informative) [A1] Relationship between this European Standard the General Safety and Performance Requirements of Regulation (EU) 2017/745 aimed to be covered [A1] ... 8

Foreword ... 11

[A1] Foreword to Amendment A1 [A1] ... 12

Introduction ... 13

1 Scope ... 14

2 Normative references ... 14

3 Terms and definitions ... 15

4 Symbols and abbreviated terms ... 19

5 Characterization procedure ... 20
5.1 General ... 20
5.2 Establish medical device configuration and material composition ... 23
5.2.1 General ... 23
5.2.2 Information gathering ... 24
5.2.3 Information generation ... 24
5.3 Assess material/chemical equivalence to a clinically established material or medical device ... 25
5.4 Assess the hypothetical worst-case chemical release based on total exposure to the medical device's chemical constituents ... 26
5.4.1 Establish the hypothetical worst-case chemical release ... 26
5.4.2 Assess the hypothetical worst-case chemical release ... 26
5.5 Establish an analytical evaluation threshold ... 27
5.6 Estimate the chemical release; perform extraction study ... 27
5.7 Assess the estimated chemical release (extractables profile) ... 30
5.8 Determine the actual chemical release; perform leachables study ... 30
5.9 Assess the actual chemical release (leachables profile) ... 32
5.10 Exiting the chemical characterization process ... 32

6 Chemical characterization parameters and methods ... 32
6.1 General ... 32
6.2 Material composition ... 33
6.3 Extractables and leachables ... 35
6.4 Structural composition or configuration ... 37
6.5 Analytical methods ... 38

7 Reporting of the chemical characterization data ... 39

Annex A (informative) General principles of chemical characterization ... 40
A.1 The chemical characterization process ... 40
A.2 The uses of chemical characterization ... 40
A.3 The analytical evaluation threshold ... 42
A.4 The role of chemical characterization in biological analysis ... 43

Annex B (informative) Information sources for chemical characterization ... 44
B.1 General ... 44
B.2 Information from the material supplier ... 44

B.3 Chemical analyses 45
B.3.1 General 45
B.3.2 Non-specific chemical analysis relevant to exposure assessment 45
B.3.3 Qualitative analysis 45
B.3.4 Quantitative analysis of specific toxic chemicals for exposure assessment 45
B.3.5 Qualitative and quantitative analytical methods 45
B.4 National and international material and/or product standards 46
B.5 Reporting chemical descriptions of materials 46
B.5.1 Generic name of material 46
B.5.2 Other nomenclatures and chemical descriptions of materials 46
B.6 Reporting general information concerning chemical nature of materials 47
B.7 Material master file 47

Annex C (informative) Principles for establishing biological equivalence 48
C.1 General 48
C.2 Principles of biological equivalence 48
C.3 Process for determining biological equivalence 49
C.4 Examples of chemical equivalence 49

Annex D (informative) Principles of sample extraction 51
D.1 General 51
D.2 Approaches to establishing the compositional aspects of the configuration of a medical device or the composition of a material of construction 53
D.3 Exaggerated extraction to estimate the worst-case extractables profile of a medical device or material 57
D.4 Simulated or accelerated extractions to establish clinical use extractables profiles 59
D.5 Extractions performed for correlating chemical characterization with biological testing 61

Annex E (informative) Calculation and application of the analytical evaluation threshold (AET) 63
E.1 Discussion 63
E.2 Calculation of the AET 64
E.3 Determination of the uncertainty factor 65
E.4 AET determination examples 67
E.5 Use of the AET 69
E.6 Exclusions to the AET; cohorts of concern 70

Annex F (informative) Qualification of analytical methods used for extractables/leachables 72

Annex G (informative) Reporting details for analytical methods and chemical data 75
G.1 General 75
G.2 Reporting of analytical data to facilitate toxicological risk assessment 75
G.3 Details of test article preparation (extraction) 76
G.4 Extract preparation for analysis 76
G.5 Description of the analytical methods for testing prepared extracts (include all that apply) 76
G.6 Qualification metrics for the analytical methods: 77

Bibliography 78
