

ISO 21536:2023-07 (E)

Non-active surgical implants - Joint replacement implants - Specific requirements for knee-joint replacement implants

Contents		Page
Foreword		iv
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Intended performance	6
5	Design attributes	6
5.1	General	6
5.2	Tolerances and dimensions	7
5.2.1	Tolerances and dimensions of taper connections	7
5.2.2	Surface finish of non-articulating regions of knee joint components	8
5.2.3	Surface finish of articulating surfaces of knee joint components	8
5.3	Thickness of knee joint components	8
5.3.1	General	8
5.3.2	Thickness of UHMWPE in tibial inserts, monobloc tibial components, mobile-bearing components, patella inserts and monobloc patellar components	8
5.3.3	Thickness of metal and ceramic in femoral components, tibial trays and patellar trays	9
6	Materials	10
7	Design evaluation	10
7.1	General	10
7.2	Pre-clinical evaluation	10
7.2.1	General	10
7.2.2	Test methods and performance requirements	12
7.3	Clinical investigation	18
7.4	Post market surveillance	19
8	Manufacture	19
9	Sterilization	19
10	Packaging	19
11	Information to be supplied by the manufacturer	19
11.1	General	19
11.2	Product type and dimensions	19
11.3	Constructional and functional compatibility of components	20
11.4	Marking	20
11.5	Information for the patient	20
11.6	Electronic instructions for use	20
Annex A (informative)	Evaluation of the range of relative angular motion of components of fully constrained total knee joint replacement implants	21
Bibliography		22
