## Lasers and laser-related equipment - Test methods for determination of the shape of a laser beam wavefront - Part 1: Terminology and fundamental aspects

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	2
3.1	General definitions .....	2
3.2	Definitions associated with power (energy) density distribution .....	4
3.3	Definitions associated with astigmatism .....	4
3.4	Definitions related to the characteristics and topography of the wavefront .....	5
3.5	Definitions related to wavefront gradient measurements .....	7
4	Test methods .....	8
4.1	Laser types .....	8
4.2	Safety .....	8
4.3	Test environment .....	8
4.4	Beam modification .....	9
4.5	Detector system .....	10
4.6	Wavefront measuring instruments .....	10
5	Test and measurement procedures .....	11
5.1	Alignment .....	11
5.2	Calibration .....	11
5.3	Visual inspection of automated data analysis .....	11
5.4	Measurement procedures .....	12
6	Analysis of wavefront quality .....	12
6.1	Polynomial representation of wavefronts .....	12
6.2	Computation of wavefront quality .....	12
7	Uncertainty .....	13
7.1	Requirements for uncertainty estimation .....	13
7.2	Sources of uncertainty .....	14
8	Test report .....	14
Annex A (informative)	Astigmatism and laser beams .....	15
Bibliography .....		20
