## Optics and photonics - Interferometric measurement of optical elements and optical systems - Part 1: Terms, definitions and fundamental relationships

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
<b>1</b>	<b>Scope .....</b>	<b>1</b>
<b>2</b>	<b>Wave propagation and some topics on electromagnetic theory .....</b>	<b>1</b>
2.1	Parameters, symbols, units and constants, operators and computational procedures .....	1
2.2	Maxwell's equations .....	2
2.3	Electromagnetic fields in a medium .....	3
2.4	Velocity of the wave .....	3
2.5	Refractive index .....	3
2.6	Scalar wave equation .....	3
2.7	Amplitude, angular frequency, wavelength, wave number .....	4
2.8	Complex notation, complex amplitude .....	4
2.9	Irradiance .....	5
2.10	Poynting vector .....	5
2.11	Propagation of plane waves .....	6
2.12	Propagation of spherical wave .....	8
2.13	Propagation of waves with limited extent .....	9
2.14	Propagation of aspherical waves .....	10
<b>3</b>	<b>General description of interference and different types of interferometers .....</b>	<b>12</b>
3.1	Interference between two waves .....	12
3.2	Coherence .....	14
3.3	Different arrangements of interference between two beams .....	19
3.4	Characteristic features for interferometer structures .....	25
<b>4</b>	<b>Coupled ray-paths in interferometers .....</b>	<b>33</b>
4.1	Aperture stops and field stops; telecentric imaging .....	33
4.2	Coupled ray-path .....	34
4.3	Difference of coherent/incoherent optical imaging .....	34
4.4	Principal layout of an interferometer .....	35
4.5	Consequences of not properly imaging the test piece onto the detector .....	39
<b>5</b>	<b>Random and systematic error sources .....</b>	<b>39</b>
Annex A (informative)	Visibility of fringes .....	41
Bibliography .....		42
