Foreword iv

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 General considerations 2
4.1 General 2
4.2 Selection of animal species 3
4.3 Animal status 3
4.4 Animal care and husbandry 3
4.5 Size and number of groups 3
4.6 Route of exposure 4
4.7 Sample preparation 4
4.8 Dosing 5
4.9 Body weight and food/water consumption 6
4.10 Clinical observations 6
4.11 Clinical pathology 6
4.12 Anatomic pathology 7
4.13 Study designs 7
4.14 Quality of investigation 7

5 Acute systemic toxicity 7
5.1 General 7
5.2 Study design 8
5.3 Evaluation criteria 9
5.4 Final report 10

6 Repeated exposure systemic toxicity (subacute, subchronic and chronic systemic toxicity) 11
6.1 General 11
6.2 Study design 12
6.3 Evaluation criteria 14
6.4 Final report 15

Annex A (informative) Routes of administration 16

Annex B (informative) Dosage volumes 18

Annex C (informative) Common clinical signs and observations 19

Annex D (informative) Suggested haematology, clinical chemistry and urinalysis measurements 20

Annex E (informative) Suggested organ list for histopathological evaluation 22

Annex F (informative) Information on material-mediated pyrogens 24

Bibliography 26
