ISO 22523:2006-10 (E)

External limb prostheses and external orthoses - Requirements and test methods

Contents

Page

Foreword vi

Introduction vii

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 General requirements 4
4.1 Risk management 4
4.2 Intended performance and technical documentation 5
4.3 Clinical evaluation 5
4.4 Strength and related conditions of use 5

5 Requirements for materials 6
5.1 Flammability of materials and toxicity of combustion products 6
5.2 Biocompatibility, contaminants and residues 7
5.2.1 General 7
5.2.2 Contaminants and residues 7
5.3 Infection and microbiological contamination 7
5.4 Resistance to corrosion and degradation 7

6 Noise and vibration 7

7 Electromagnetic compatibility (EMC) 8

8 Electrical safety 8
8.1 Battery-powered prosthetic and orthotic devices 8
8.1.1 Battery housings and connections 8
8.1.2 Charge level indicators 8
8.2 Circuit protection 9
8.3 Electronic programmable systems 9
8.4 Electrically heated blankets, pads and similar flexible heating appliances 9
8.5 Prosthetic and orthotic devices with skin contact electrodes 9
8.6 Prosthetic and orthotic devices with radio equipment 9
8.6.1 General 9
8.6.2 Frequency spectrum of radio equipment 9
8.6.3 Operation of radio equipment by the user 9

9 Surface temperature 10

10 Sterility 10

11 Design requirements 10
11.1 Safety of moving parts 10
11.2 Safety of connections 10

12 Mechanical requirements 10
12.1 Restrictions on use 10
12.2 Forces in soft tissues of the human body 11

12.3 Ergonomic principles 11

13 Information supplied by the manufacturer 11
13.1 General 11
13.2 Labelling 12
13.3 Intended use 12

14 Packaging 12

Annex A (informative) Guidance on methods of determining the strength of upper-limb prosthetic devices 13

Annex B (normative) Method of determining the mechanical properties of knee joint assemblies for lower-limb orthotic devices 28

Annex C (informative) Guidance on methods of determining the flammability and toxicity of combustion products of lower-limb prosthetic devices 41

Annex D (informative) Guidance on methods of establishing the force or moment required to operate the control and actuating mechanisms on prosthetic and orthotic devices 55

Annex E (informative) Reference to the essential principles of safety and performance of medical devices in accordance with ISO/TR 16142 80

Bibliography 82

Figure A.1 -- Test sample segment lengths 15

Figure A.2 -- Configuration of test 1 16

Figure A.3 -- Configuration of test 2 and test 4 17

Figure A.4 -- Configuration of test 3 and test 5 17

Figure A.5 -- Examples of test sample configurations 18

Figure B.1 -- Example of a test rig design suitable for the application of the four-point loading system 34

Figure B.2 -- Arrangements of the four-point loading system (continued on Figure B.3) 35

Figure B.3 -- Arrangements of the four-point loading system (continued from Figure B.2) 36

Figure B.4 -- Test orientations for joint assemblies intended to restrain motion in four directions mutually at right angles (see B.5.1) 37

Figure B.5 -- Example of a bending moment/angular deflection curve: single-stage failure (see 3.17, 3.18 and 3.19) 38

Figure B.6 -- Examples of a bending moment/angular deflection curve: two-stage failures (see 3.17, 3.18 and 3.19) 39

Figure C.1 -- Test sample dimensions trans-femoral (above-knee) -- Finished limb 48

Figure C.2 -- Test sample dimensions trans-tibial (below-knee) -- Finished limb 49

Figure C.3 -- Test sample dimensions trans-femoral (above-knee) -- Socket former 50

Figure C.4 -- Test sample dimensions trans-tibial (below-knee) -- Socket former 50

Figure C.5 -- Radiant heat source test 51

Figure C.6 -- Flaming ignition source test 52

Figure C.7 -- Sample support frame and weighing platform 53

Figure D.1 -- Bowden cable arrangement during test 69

Figure D.2 -- Test set-up according to D.6.2 for sample category D.3.1 a) Orthotic knee joints with locking mechanism 70

Figure D.3 -- Test set-up according to D.6.3 for sample category D.3.1 b) Orthotic elbow joints with locking mechanism 70

Figure D.4 -- Test set-up according to D.6.4 for sample category D.3.1 c) Prosthetic knee units with locking mechanism (continued on Figure D.5) 71

Figure D.5 -- Test set-up according to D.6.4 for sample category D.3.1 c) Prosthetic knee units with locking mechanism (continued from Figure D.4) 72

Figure D.6 -- Test set-up according to D.6.5 for sample category D.3.1 d) Prosthetic elbow units with locking mechanism 72

Figure D.7 -- Test set-up according to D.6.6 for sample category D.3.1 e) Prosthetic elbow units with user-driven articulation 73

Figure D.8 -- Test set-up according to D.6.7 for sample category D.3.1 f) Terminal devices with built-in closing function 74

Figure D.9 -- Test set-up according to D.6.8 for sample category D.3.1 g) Terminal devices with built-in opening function 75

Figure D.10 -- Test set-up according to D.6.9 for sample category D.3.1 h) Terminal devices with no built-in closing or opening function, actuated by force application 76

Figure D.11 -- Test set-up according to D.6.10 for sample category D.3.1 i) Terminal devices with no built-in closing or opening function, actuated by torque application 77

Figure D.12 -- Test set-up according to D.6.11 for sample category D.3.1 j) Terminal devices with break-open feature for emergency situations 78

Figure D.13 -- Test set-up according to D.6.12 for sample category D.3.1 k) Prosthetic devices with fail-safe release unit, illustrated for a separable prosthetic adaptor plate 79

Table A.1 -- Number of tests and test samples required 19

Table B.1 -- Example of test report 40

Table C.1 -- Worked example of calculating the TTPD 54

Table D.1 -- Parameters of the test set-up for sample category D.3.1 a) 60

Table D.2 -- Parameters of the test set-up for sample category D.3.1 c) 62

Table D.3 -- Details of the test report 67

Table D.4 -- Values of actuating/operating force (and displacement) and moment measured on different categories of test sample 68

Table E.1 -- Correspondence between this International Standard and the essential principles of ISO/TR 16142 81
