

DIN EN ISO 14880-2:2007-03 (E)

Optics and photonics - Microlens arrays - Part 2: Test methods for wavefront aberrations (ISO 14880-2:2006)

Contents		Page
Foreword		3
Introduction		4
1 Scope		5
2 Normative references		5
3 Terms and definitions		5
4 Symbols and abbreviated terms		5
5 Apparatus		6
5.1 General		6
5.2 Standard optical radiation source		6
5.3 Standard lens		6
5.4 Collimator		6
5.5 Beam reduction optical system		6
5.6 Aperture stop		7
6 Test principle		7
7 Measurement arrangement		7
7.1 Measurement arrangement for single microlenses		7
7.2 Measurement arrangement for microlens arrays		7
7.3 Geometrical alignment of the sample		8
7.4 Preparation		8
8 Procedure		8
9 Evaluation		8
10 Accuracy		8
11 Test report		9
Annex A (normative) Measurement requirements for test methods for microlenses		10
Annex B (normative) Microlens test Methods 1 and 2 using Mach-Zehnder interferometer systems ..		12
Annex C (normative) Microlens test Methods 3 and 4 using a lateral shearing interferometer system		17
Annex D (normative) Microlens test Method 5 using a Shack-Hartmann sensor system		22
Annex E (normative) Microlens array test Method 1 using a Twyman-Green interferometer system ..		24
Annex F (normative) Measurement of uniformity of microlens array determined by test Method 2		26
Bibliography		29
