DIN EN 12732:2013-07 (E)

Gas infrastructure - Welding steel pipework - Functional requirements

Contents

Page

Foreword 5

1 Scope 6

2 Normative references 8

3 Terms and definitions 10

4 Quality system 13
4.1 General 13
4.2 Welding contractors 14
4.3 Welders 14
4.4 Welding supervisory and coordination personnel 14
4.5 Testing companies and personnel 14
4.5.1 General 14
4.5.2 Non-destructive testing (NDT) 14
4.5.3 Destructive testing (DT) 15

5 Welding consumables 15

6 Production welding 17
6.1 General requirements 17
6.1.1 General 17
6.1.2 Working area 17
6.1.3 Layout of weld joints 17
6.1.4 Types of weld joints 17
6.1.5 Joint edge preparation 17
6.1.6 Weld fit-up 17
6.1.7 Different wall thickness 17
6.1.8 Pipe branches and nozzles 17
6.1.9 Laminations 17
6.1.10 Butt welds cross joints 17
6.2 Joint preparation 18
6.2.1 Pipe end preparation 18
6.2.2 Alignment of the joints 18
6.3 Preheating 18
6.4 Tacking 18
6.5 Welding 18
6.6 Actions after welding 19
6.7 Repair of weld defects 19

7 Special procedures 19
7.1 General 19
7.2 Attachment of structural parts 19
7.3 Attachment of cathodic protection connections 20
7.4 Hot-tapping and other welding work on in-service pipelines 20

8 Inspection of the weld joint 20
8.1 General 20
8.2 Scope of inspection 20
8.3 Non-destructive testing and assessment levels 23
8.4 Time of inspection 24

8.5 Acceptance criteria 24
8.6 Recording of test results 25

9 Documentation 25
9.1 General 25
9.2 Archiving requirements 25

10 Specific requirements for gas infrastructure with a MOP up to and including 16 bar 25
10.1 General 25
10.2 Welders 25
10.3 Welding supervisory personnel 26
10.4 Production welding 26
10.4.1 General 26
10.4.2 Joint preparation 26
10.4.3 Welding 26
10.5 Requirements for records and documentation 26

11 Specific requirements for gas infrastructure with a MOP greater than 16 bar 27
11.1 General 27
11.2 Welders 27
11.3 Welding supervisory personnel 27
11.4 Qualification of welding procedures 27
11.4.1 General 27
11.4.2 Filler material requirements for welding procedure qualification 27
11.4.3 Impact testing 28
11.4.4 Transverse tensile test 28
11.4.5 All-weld-metal tensile test 29
11.5 Production welding 29
11.5.1 General 29
11.5.2 Joint preparation 29
11.5.3 Welding 29
11.5.4 Repairs of weld defects 30
11.5.5 Welding consumables 30
11.6 Destructive testing of production welds 30
11.7 Acceptance requirements 30
11.8 Requirements for records and documentation 31

12 Specific requirements for metering, regulating and compressor stations 32
12.1 General 32
12.2 Specific requirements 32

Annex A (informative) Qualification procedure for pipeline welders (Girth welds and branch connections) 33

A.1 General 33
A.2 Approval test 33
A.2.1 Execution of the approval test 33
A.2.2 Range of test pieces 33
A.2.3 Supervision of execution of approval test 34
A.3 Inspection 34
A.3.1 General 34
A.3.2 Testing girth welds 35
A.3.3 Testing weldolets 35
A.4 Approval range 35
A.4.1 General 35
A.4.2 Dimension ranges 35
A.4.3 Techniques 35
A.5 Certificate 36
A.5.1 General 36
A.5.2 Duration of validity 36

Annex B (informative) Testing of lamination defects 37

Annex C (informative) Time-of-flight diffraction technique (TOFD) 38

C.1 General 38
C.2 Additional and substitutional requirements to EN ISO 10863:2011 38
C.2.1 Addition to the whole document EN ISO 10863:2011 38
C.2.2 Addition to EN ISO 10863:2011, Clause 3 "Terms and definitions" 38
C.2.3 Addition to EN ISO 10863:2011, Clause 5, "Examination Levels" 40
C.2.4 Addition to EN ISO 10863:2011, 7.2.2, "Ultrasonic probes" 40
C.2.5 Substitution of EN ISO 10863:2011, Clause 11, 3 rd paragraph "Weld testing" 40
C.2.6 Substitution of EN ISO 10863:2011, 12.5.2 "Sizing" 41

Annex D (informative) Critical aspects for hot-tap welding or welding on in-service pipelines 46

D.1 General 46
D.2 Recommendations 46
D.2.1 Equipment 46
D.2.2 Supervision 46
D.2.3 Safety precautions 46
D.2.4 Identification 46
D.2.5 Filler materials 46
D.3 Weld preparation 47
D.4 Welding procedure specification (WPS) 47
D.4.1 Description of the WPS 47
D.4.2 Qualification of the WPS 47
D.4.3 Approval of the WPS 47
D.5 Qualification of the welder 47
D.6 Precautions 47
D.7 Execution 48
D.8 Repairs 48
D.9 WPS qualification record 48

Annex E (informative) Visual examination of joints 50

E.1 General 50
E.2 Recommendations 50

Annex F (informative) Manual ultrasonic testing of weld joints for wall thickness between approximately 6 mm and 8 mm 51

F.1 General 51
F.2 Setting 51
F.2.1 Setting of range 51
F.2.2 Sensitivity adjustment when using the Distance Gain Size method 51

Annex G (normative) Acceptance criteria - Recommendations for on-site production welds 55

G.1 General 55
G.2 Acceptance criteria according to EN ISO 5817 55
G.3 Summary of requirements for defect acceptance levels and defect limits 58
G.3.1 General 58
G.3.2 Requirements 59
G.4 Method and acceptance criteria for ultrasonic inspection assessment 66
G.4.1 Distance Gain Size method 66
G.4.2 Comparative Element method 66
G.4.3 General 67
G.4.4 Assessment of indications using automatic pulse-echo technique 68

Annex H (informative) Brazing and aluminothermic welding of leads for cathodic protection systems 69

H.1 Joining techniques 69

H.2 Procedure qualification 69
H.3 Operation qualification 71
H.4 Production joints 71

Annex I (informative) Significant technical changes between this European Standard and the previous edition 72

Bibliography 74
