DIN EN 1918-4:2016-11 (E)

Gas infrastructure - Underground gas storage - Part 4: Functional recommendations for storage in rock caverns

Contents

Page

European foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 5
3.1 Terms and definitions common to parts 1 to 4 of EN 1918 5
3.2 Terms and definitions not common to parts 1 to 4 of EN 1918 9

4 General requirements 10
4.1 General 10
4.2 Underground gas storage 10
4.3 Long-term containment of stored products 15
4.4 Environmental conservation 16
4.5 Safety 16
4.6 Monitoring 16

5 Design 16
5.1 Design principles 16
5.2 Geological exploration 18
5.3 Stored product containment 19
5.4 Determination of the maximum operating pressure (MOP) 19
5.5 Cavern stability 20
5.6 Construction parameters 21
5.7 Concrete plug specifications 21
5.8 Connecting caverns to surface 21
5.9 Monitoring systems 24
5.10 Neighbouring subsurface activities 24

6 Construction 25

7 Testing and commissioning 26
7.1 General 26
7.2 First gas filling 27

8 Operation, monitoring and maintenance 27
8.1 Operating principles 27
8.2 Monitoring 27
8.3 Maintenance 28
8.4 HSE 28

9 Abandonment 29
9.1 General 29
9.2 Withdrawing the fluid 29
9.3 Plugging and abandonment of wells and accesses 29
9.4 Surface facilities 30
9.5 Monitoring 30

Annex A (informative) Non-exhaustive list of relevant standards 31
