

DIN EN 16723-2:2017-10 (E)

Natural gas and biomethane for use in transport and biomethane for injection in the natural gas network - Part 2: Automotive fuels specification

Contents		Page
European foreword		3
Introduction		4
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Parameters and test methods	8
4.1	General	8
4.2	Standard reference conditions	8
4.3	Requirements, limit values and related test methods for natural gas and biomethane as automotive fuels	9
4.4	Requirement on climate-dependant characteristic and test methods for natural gas and biomethane as automotive fuels	10
5	Sampling	10
6	Marking, labelling and packaging	10
Annex A (informative) Parameters		11
A.1	Total silicon	11
A.2	Hydrogen	11
A.3	Compressor oil, dust impurities and biogenic materials	12
A.4	Water dew point	12
A.5	Hydrocarbon dew point temperature	13
A.6	Hydrogen sulfide plus Carbonyl sulfide	13
Annex B (informative) Odorization and sulfur		14
B.1	CEN/TC 408 approach	14
B.2	General	14
B.3	Total sulfur from Odorants	14
Annex C (informative) Properties of gases at the extremities of the Wobbe index ranges of the gas groups for gases of the second family		15
C.1	Introduction	15
C.2	Basis of calculations of indicative ranges	16
C.3	Calculated properties	17
C.4	Conclusions	17
Annex D (informative) Voluntary dedicated grades		20
Bibliography		22
