

# DIN EN ISO 16924:2018-11 (E)

## Natural gas fuelling stations - LNG stations for fuelling vehicles (ISO 16924:2016)

---

<b>Contents</b>		<b>Page</b>
European foreword .....		6
Foreword .....		8
<b>1</b>	<b>Scope</b> .....	<b>9</b>
<b>2</b>	<b>Normative references</b> .....	<b>9</b>
<b>3</b>	<b>Terms and definitions</b> .....	<b>10</b>
<b>4</b>	<b>Abbreviated terms</b> .....	<b>17</b>
<b>5</b>	<b>Risk management</b> .....	<b>18</b>
5.1	Risk assessment .....	18
5.1.1	General .....	18
5.1.2	Protection against overpressure .....	18
5.1.3	Static electricity .....	19
5.2	Fire protection .....	19
5.2.1	Hazardous area classification .....	19
5.2.2	Sources of ignition .....	19
5.2.3	Fire fighting .....	20
5.3	Explosion protection measures .....	20
<b>6</b>	<b>General design requirements</b> .....	<b>20</b>
6.1	General .....	20
6.1.1	Design philosophy .....	20
6.1.2	Buildings and civil works .....	21
6.1.3	Installation and construction .....	22
6.2	Site layout .....	23
6.2.1	Separation distances .....	23
6.2.2	Traffic management .....	23
6.2.3	Security .....	23
6.2.4	Requirements for location of equipment .....	23
6.3	Environmental considerations .....	24
6.3.1	Noise attenuation .....	24
6.3.2	Prevention of venting of natural gas .....	24
<b>7</b>	<b>Fuel supply to the fuelling station</b> .....	<b>24</b>
7.1	Application .....	24
7.2	Equipment compatibility .....	24
7.3	Filling connector .....	25
7.4	Requirements for filling .....	25
7.4.1	General requirements .....	25
7.4.2	Prevention of overpressurization and overfilling .....	25
7.5	Prevention of back flow .....	25
7.6	Bleed connections .....	25
7.7	Draining of liquid from the LNG storage tank .....	26
7.8	LNG tanker .....	26
7.8.1	Immobility .....	26
7.8.2	Anti-drive-away equipment .....	26
7.8.3	Turning off the engine .....	26
7.8.4	Equalizing the potentials .....	26
<b>8</b>	<b>Storage</b> .....	<b>26</b>
8.1	LNG storage .....	26
8.1.1	Design and construction .....	26
8.1.2	Safety requirements .....	28
8.1.3	Installation guidance .....	32
8.2	CNG buffer storage .....	33

<b>9</b>	<b>Pumps and compressors</b>	<b>33</b>
9.1	Connection of LNG pumps to the LNG storage tank	33
9.1.1	General	33
9.1.2	NPSH requirements	33
9.1.3	Vapour return	33
9.1.4	Protection against weather	33
9.1.5	Accessibility	34
9.2	LNG centrifugal pump (including ancillaries)	34
9.2.1	General provisions	34
9.2.2	Liquid inlet to the centrifugal pump	34
9.2.3	Centrifugal pump design	34
9.2.4	Vibration	34
9.2.5	Detection of shaft seal leak	35
9.2.6	Detection of cavitation	35
9.3	LNG reciprocating pump for LCNG fuelling stations (including ancillaries)	35
9.3.1	General provisions	35
9.3.2	Liquid supplied to the reciprocating pump	35
9.3.3	Design	35
9.3.4	Vibration	35
9.3.5	Pulsation	35
9.4	Commonalities for LNG centrifugal and reciprocating pumps	35
9.4.1	Suction line	35
9.4.2	Instrumentation	36
9.4.3	Markings of a pump	36
9.4.4	Instructions	36
9.5	Natural gas compressor	37
<b>10</b>	<b>Dispensers</b>	<b>37</b>
10.1	LNG dispensers	37
10.1.1	General requirements	37
10.1.2	Breakaway system	39
10.1.3	Fuelling hoses	39
10.1.4	Fuelling nozzles	40
10.1.5	Dispenser enclosure	40
10.1.6	Other requirements	41
10.2	CNG dispensers	41
<b>11</b>	<b>Vaporizers and heaters</b>	<b>42</b>
11.1	Application	42
11.2	Design of vaporizers and heaters	42
11.3	Ambient air vaporizer	43
11.3.1	General	43
11.3.2	Defrosting	43
11.3.3	Aluminium vaporizers	43
11.4	Electric vaporizer/heater	43
11.5	Water bath vaporizer	44
11.6	Fired vaporizers	44
11.7	Remotely heated vaporizers	44
<b>12</b>	<b>Odorization</b>	<b>44</b>
12.1	General requirements	44
12.2	High-pressure odorizer	45
12.3	Safety	45
12.4	Monitoring	45
12.5	Odorant	46
12.6	Dynamics of function	46
<b>13</b>	<b>Pipework</b>	<b>46</b>
13.1	General	46

13.2	Pipework design.....	46
13.2.1	General.....	46
13.2.2	Overground pipework.....	47
13.2.3	Underground pipework.....	47
13.2.4	Pipework in ducts.....	47
13.2.5	Flexible connections.....	48
<b>14</b>	<b>Electrical equipment and wiring.....</b>	<b>48</b>
14.1	General.....	48
14.2	Main considerations.....	48
14.2.1	Grounding.....	48
14.2.2	Lightning.....	48
14.2.3	Contact with live parts.....	48
14.2.4	Cables.....	48
14.2.5	Static electricity.....	49
14.3	Other considerations.....	49
14.3.1	Interface.....	49
14.3.2	Primary seal.....	49
14.3.3	Additional seal.....	49
14.3.4	Conduit seals.....	49
14.3.5	Detection vents.....	50
<b>15</b>	<b>Instrumentation and control system.....</b>	<b>50</b>
15.1	General.....	50
15.2	Gas detectors.....	50
15.3	Flame detectors.....	50
15.4	Pressure gauges.....	50
15.5	Temperature sensors.....	50
15.6	Manual emergency shutdown devices.....	50
15.7	Emergency power supply unit.....	51
<b>16</b>	<b>Emergency shutdown.....</b>	<b>51</b>
16.1	Application.....	51
16.2	Procedure.....	51
16.3	Activation.....	51
16.4	ESD action.....	51
16.5	Reset.....	52
<b>17</b>	<b>Special configurations.....</b>	<b>52</b>
17.1	Movable LNG fuelling station.....	52
17.1.1	General requirements.....	52
17.1.2	Anchoring.....	52
17.1.3	Containment.....	52
17.2	Mobile LNG fuelling station.....	52
17.2.1	General requirements.....	52
17.2.2	Anchoring.....	53
17.2.3	Containment.....	53
17.2.4	Design.....	53
17.2.5	Additional requirements for operation.....	53
<b>18</b>	<b>Testing and commissioning.....</b>	<b>53</b>
18.1	Testing.....	53
18.1.1	Electrical testing.....	53
18.1.2	Pressure strength testing.....	54
18.1.3	Leak testing.....	54
18.2	Commissioning.....	54
18.2.1	General provisions.....	54
18.2.2	Purging.....	55
18.2.3	Functional testing.....	55
18.2.4	First filling of the LNG storage tank and other components.....	55

<b>19</b>	<b>Operations</b> .....	<b>55</b>
19.1	LNG tanker offloading.....	55
19.2	Fuelling procedure.....	55
19.3	Safety signs.....	56
19.3.1	General on identification labels.....	56
19.3.2	Equipment marking.....	56
19.4	Equipment and pipework identification.....	57
19.5	Training.....	57
19.6	Installation and operating instructions.....	58
19.7	Emergency plan.....	59
19.8	Maintaining the emergency shutdown.....	59
<b>20</b>	<b>Inspection and maintenance</b> .....	<b>59</b>
20.1	Inspection.....	59
20.1.1	General requirements.....	59
20.1.2	Inspection and testing of electrical systems.....	60
20.1.3	Inspection and re-testing of the safety relief valves.....	60
20.1.4	Safety and fire protection equipment.....	61
20.2	Maintenance.....	61
20.2.1	Preventive maintenance planning.....	61
20.2.2	Maintenance procedures.....	61
20.2.3	Maintenance safety.....	61
20.2.4	Draining of the LNG storage tank.....	62
<b>Annex A</b>	<b>(informative) Examples of hazardous zones classification</b> .....	<b>63</b>
<b>Annex B</b>	<b>(normative) Separation distances</b> .....	<b>67</b>
<b>Annex C</b>	<b>(informative) Example flow diagram of an LNG fuelling station</b> .....	<b>71</b>
<b>Annex D</b>	<b>(informative) Example flow diagram of an LCNG fuelling station</b> .....	<b>72</b>
<b>Annex E</b>	<b>(informative) Example flow diagram of an LNG and LCNG fuelling station</b> .....	<b>73</b>
<b>Annex F</b>	<b>(informative) Process requirements for the effective cryogenic pump operation</b> .....	<b>74</b>
<b>Annex G</b>	<b>(informative) Recommendations for installation of a centrifugal pump</b> .....	<b>75</b>
<b>Annex H</b>	<b>(informative) Recommendations for centrifugal pump design</b> .....	<b>76</b>
<b>Annex I</b>	<b>(informative) Recommendations for installation of a reciprocating pump</b> .....	<b>77</b>
<b>Annex J</b>	<b>(informative) Recommendations on the content of the cryogenic pump operation instructions</b> .....	<b>79</b>
<b>Annex K</b>	<b>(informative) Example flow diagram of a high-pressure odorizer</b> .....	<b>81</b>
<b>Annex L</b>	<b>(informative) LNG identification mark of an LNG fuelling station</b> .....	<b>82</b>
<b>Bibliography</b>	.....	<b>83</b>
