DIN EN 419:2020-04 (E)

Gas-fired overhe ad luminous radiant heaters for non-domestic use - Safety and energy efficiency

Contents

Page

European foreword 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7
3.1 Appliance and its constituent parts 7
3.2 Adjusting, control and safety devices 9
3.3 Operation of the appliance 11
3.4 Gases 14
3.5 Conditions of operation and measurement 15
3.6 Energy efficiency 18
3.7 Country of destination 19
3.8 Symbols 19

4 Classification of appliances 22
4.1 Classification of gases and categories 22
4.2 Classification according to the mode of evacuation of the combustion products 22

5 Constructional requirements 23
5.1 General 23
5.2 Requirements for adjusting, control and safety devices 27
5.3 Ignition devices 31
5.4 Main burner 32
5.5 Pressure test points 32
5.6 Injectors 32

6 Operational requirements 32
6.1 Test methods 32
6.2 Soundness of the gas circuit 38
6.3 Heat inputs 39
6.4 Pressure regulator 41
6.5 Limiting temperatures 41
6.6 Ignition, cross-lighting and flame stability 43
6.7 Combustion 47
6.8 Determination of electrical power consumption 53

7 Radiant Efficiency 54
7.1 General 54
7.2 General principle of the measurement and calculation of radiant factor 54
7.3 Test room 54
7.4 Test equipment 55
7.5 Test procedure 58
7.6 Calculation of radiant factor 60
7.7 Test report 63

8 Requirements of energy efficiency (rational use of energy) 63
8.1 General 63
8.2 Seasonal energy efficiency 64

9 Risk assessment ... 66

10 Marking and instructions ... 67
10.1 Marking of the appliance and the packaging ... 67
10.2 Instructions ... 69
10.3 Presentation ... 73
10.4 Information Requirements of Local Space Heaters ... 73

Annex A (informative) National situations ... 74

A.1 General ... 74
A.2 Gas rate adjusters, aeration adjusters and regulators ... 74
A.3 Conversion to different gases ... 74
A.4 Gas connections in the various countries ... 74

Annex B (informative) Equivalence rules ... 76

B.1 Conversion to categories within a restricted Wobbe index range ... 76
B.2 Conversion to categories within an identical Wobbe index range ... 76
B.3 Conversion to categories within a wider Wobbe index range ... 77

Annex C (informative) Identification of the types of gas in use in the various countries ... 78

Annex D (normative) Special national conditions ... 80

Annex E (normative) Calculation of conversions of NOx ... 81

E.1 NOx emission conversion factors ... 81
E.2 NOx conversion calculation ... 82

Annex F (informative) National situations of countries whose national bodies are CEN associate members ... 84

Annex G (informative) Radiometer design ... 85

G.1 Principle radiometer design features ... 85
G.2 Radiometer technical design ... 86
G.3 Pyro-electric detector ... 86
G.4 Ulbricht Sphere ... 86

Annex H (informative) Radiometer calibration ... 89

H.1 Radiometer calibration procedure ... 89
H.2 Black body calibration equipment and procedure ... 89
H.2.1 General ... 89
H.2.2 Temperature calibration at reference condition ... 90
H.2.3 Temperature calibration at higher temperatures ... 91
H.2.4 Calibration calculation ... 92
H.3 Calibration procedure in detail, presented as a worked example ... 93
H.3.1 Calibration Measurements ... 93
H.3.2 Selecting the average readings ... 94
H.3.3 Determination of the 1/S sensitivity per temperature ... 94
H.3.4 Determining the 1/S sensitivity of the radiometer ... 95
H.3.5 Documentation of calibration results ... 95

Annex I (normative) Correction of measured radiant output for absorption by H O= and CO2 2 ... 99

I.1 General ... 99
I.2 Calculation method ... 101

Annex J (informative) Radiant heat output data - Recording of results ... 102

J.1 General information to be recorded 102
J.1.1 Test and appliance data 102
J.1.2 Radiometer technical data 102
J.1.3 Measuring plane technical data 102
J.1.4 Measurement results 103
J.1.5 Test information 103
J.1.6 Test ambient conditions 103
J.1.7 Gas/heat input data 103
J.1.8 Flue gas data 104
J.1.9 Absorption of water vapour and CO2 104
J.1.10 Irradiation measurement data 104

Annex K (informative) Worked example 105

K.1 General information 105
K.2 Radiometer technical data 105
K.3 Measuring plane technical data 105
K.4 Measurement results 106
K.4.1 Test information 106
K.4.2 Test ambient conditions 106
K.4.3 Gas/heat input data 106
K.4.4 Flue gas data 107
K.4.5 Absorption of water vapour and CO2 data 107
K.4.6 Irradiation measurement data 107

Annex L (normative) Product information required 108

Annex M (normative) Accepted heat input deviation 109

M.1 General 109

Annex N (normative) Uncertainty of measurements 110

Annex O (informative) Different types of heat input control 112

AnnexZA (informative) Relationship between this European Standard and the ecodesign requirements of Commission Regulation (EU) No 2015/1188 aimed to be covered 113
