ISO 23306:2020 (E)

Specification of liquefied natural gas as a fuel for marine applications

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 General requirements

5 Sampling

6 Requirements, limit values and related test methods

7 Main compounds removed by liquefaction process

Annex A (normative) Propane knock index: Methane number calculation method

Annex B (informative) Examples of LNG composition

Annex C (informative) Methane number (knock resistance) and Wobbe index (thermal input through a restriction)

C.1 Methane number
C.2 Wobbe index

Annex D (informative) LNG ageing along the bunkering chain

D.1 Ageing
D.2 Composition change due to ageing
D.3 Importance of understanding and managing LNG ageing

Annex E (informative) Particles

Annex F (informative) Melting and boiling points of pure components and impurities that can be present in different LNG
