

# DIN EN ISO 23306:2022-11 (E)

## Specification of liquefied natural gas as a fuel for marine applications (ISO 23306:2020)

---

<b>Contents</b>		<b>Page</b>
European foreword .....		3
Foreword .....		4
Introduction .....		5
1 <b>Scope</b> .....		6
2 <b>Normative references</b> .....		6
3 <b>Terms and definitions</b> .....		6
4 <b>General requirements</b> .....		7
5 <b>Sampling</b> .....		8
6 <b>Requirements, limit values and related test methods</b> .....		8
7 <b>Main compounds removed by liquefaction process</b> .....		9
<b>Annex A (normative) Propane knock index: Methane number calculation method</b> .....		11
<b>Annex B (informative) Examples of LNG composition</b> .....		17
<b>Annex C (informative) Methane number (knock resistance) and Wobbe index (thermal input through a restriction)</b> .....		20
<b>Annex D (informative) LNG ageing along the bunkering chain</b> .....		22
<b>Annex E (informative) Particles</b> .....		23
<b>Annex F (informative) Melting and boiling points of pure components and impurities that can be present in different LNG</b> .....		24
<b>Bibliography</b> .....		26
