ISO/TS 16922:2022-09 (E)

Natural gas - Odorization

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 General requirements **2**
4.1 Necessary odorant addition 2
4.2 Requirements and parameters for consideration when selecting an odorant 2
4.3 Public awareness 3

5 General remarks on odorant behaviour **3**
5.1 Masking and fading of odorants 3
5.2 Seals and membranes 3
5.3 Pipelines 3
5.4 Buried pipeline 3

6 Safety precautions **3**
6.1 Handling of odorants 3
6.2 Spill management and remediation 4
6.3 Transportation and storage 4

7 Odorization technique **5**
7.1 Odorization of pipeline networks 5
7.1.1 Odorization of transmission pipelines 5
7.1.2 Odorization of distribution pipelines 5
7.1.3 Combined odorization of transmission and distribution pipelines 5
7.2 Odorizer 6
7.2.1 General 6
7.2.2 Liquid injection odorizers 6
7.2.3 Positioning of odorant injectors 6
7.2.4 Evaporation odorizers 7
7.3 Design of installation 8
7.3.1 Odorization rooms 8
7.3.2 Ventilation 8
7.3.3 Installation of injection point and injection pipe 8
7.3.4 Tank design and operations 8
7.3.5 Spill kit 8
7.4 Pressure resistance 9
7.5 Addition of odorant 9
7.5.1 Control of the addition 9
7.5.2 Monitoring and control devices 9
7.5.3 Testing and commissioning 9

8 Control of odorization **9**
8.1 General 9
8.2 Check of odorization equipment and systems 10
8.3 Control of odorization of the gas 10
8.4 Odour complaints 10

Bibliography **11**
