Anaesthetic and respiratory equipment - Tracheostoma valves; Text in English

Inhalt

Seite

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 General requirements 7

5 Materials 7
5.1 Biological safety testing 7
5.2 Intended use and environmental conditions 7
5.3 Leaching 8
5.4 Cleaning, disinfecting or sterilization agents 8
5.5 Phthalates 8
5.6 Natural rubber (latex) 8
5.7 Gas compatibility 8
5.8 Durability and marking 8
5.9 Resistance to deterioration 8
5.10 Magnetic resonance imaging (MRI) compatibility 8

6 Requirements 8
6.1 General 8
6.2 Mechanical safety 8
6.3 Device Lifetime 9
6.4 Warning options for unintended airway obstruction 9

7 Requirements for airways and related equipment supplied sterile 9

8 Packaging 9

9 Information supplied by the manufacturer 10
9.1 Marking 10
9.2 Instructions for use 10
9.2.1 General 10
9.2.2 Letter code for T-VALs 10

Annex A (informative) Rationale 12
A.1 General 12
A.2 T-VALs 12

Annex B (informative) Hazard identification for risk assessment 13
B.1 General 13
B.2 Patient harm associated with the use of T-VALs 13
B.2.1 Suffocation 13
B.2.2 Acute pulmonary/airway damage 13
B.2.3 Chronic pulmonary damage 13
B.2.4 Emphysema 13
B.2.5 Risks using a tracheostoma valve in combination with a respirator 13
B.2.6 Risks using a tracheostoma valve in combination with a tracheostomy tube 14
