Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Types of syringe 3

5 Freedom from extraneous matter 3

6 Limits for extraneous matter 3

7 Lubrication of syringes and needles 4

8 Range of sizes 4

9 Graduated scale 4

10 Barrel 5

11 Piston/plunger assembly 5

12 Nozzle 6

13 Needle tubing and needles 6

14 Performance of assembled syringe 6

15 Packaging 7

16 Marking 8

Annex A (normative) Fluid for determination of acidity/alkalinity and extractable metals 11

Annex B (normative) Test method for air leakage past syringe piston during aspiration 12

Annex C (normative) Test method for force required to operate plunger 14

Annex D (normative) Properties of needles and needle tubing 15

Annex E (normative) Test method for determination of dead space 17

Annex F (normative) Test method for liquid leakage at syringe piston and syringe nozzle/hub or needle/barrel unions during compression 18

Annex G (normative) Test method for air leakage past nozzle/hub or needle/barrel unions during aspiration 20

Annex H (informative) Preparation of extract for test for pyrogenicity and toxicity 21

Annex I (informative) Symbol for "do not re-use" 22
