ISO 13408-1:2008-06 (E)

Aseptic processing of health care products - Part 1: General requirements

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Quality system elements 7
4.1 General 7
4.2 Assignment of responsibilities 7
4.3 Calibration 7

5 Aseptic process definition 8
5.1 General 8
5.2 Risk management 8

6 Manufacturing environment 10
6.1 General 10
6.2 Manufacturing environment design 11
6.3 Layout 12
6.4 Material and personnel flow 14
6.5 HVAC system 15
6.6 Cleanroom qualification 17
6.7 Utility services and ancillary equipment 17
6.8 Environmental and personnel monitoring programmes 17

7 Equipment 21
7.1 Qualification 21
7.2 Maintenance of equipment 23

8 Personnel 23
8.1 General 23
8.2 Training for APA qualification 24
8.3 Gowning procedures 25
8.4 General employee health 26

9 Manufacture of the product 27
9.1 Attainment and maintenance of sterility 27
9.2 Duration of the manufacturing process 27
9.3 Aseptic manufacturing procedures 28
9.4 Cleaning and disinfection of facilities 28
9.5 Cleaning, disinfection and sterilization of equipment 30

10 Process simulation 31
10.1 General 31
10.2 Media selection and growth support 32
10.3 Simulation procedures 32
10.4 Incubation and inspection of media filled units 33
10.5 Initial performance qualification 33

10.6 Periodic performance requalification 34
10.7 Repeat of initial performance qualification 35
10.8 Documentation of process simulations 35
10.9 Disposition of filled product 36
11 Test for sterility 37
11.1 General 37
11.2 Investigation of positive units from tests for sterility 37

Annex A (informative) Example of a flow chart 38

Annex B (informative) Typical elements of an aseptic process definition 39

Annex C (informative) Examples of specific risks 40

Annex D (informative) Comparison of classification of cleanrooms 41

Annex E (informative) Specification for water used in the process 42

Annex F (informative) Aseptic processing area 44

Bibliography 45
