## Glassware - Hydrolytic resistance of the interior surfaces of glass containers - Part 1: Determination by titration method and classification

---

| <b>Contents</b>    |   | <b>Page</b> |
|--------------------|---|-------------|
| Foreword .....     |   | iv          |
| Introduction ..... |   | v           |
| 1                  | Scope .....   | 1           |
| 2                  | Normative references .....  | 1           |
| 3                  | Terms and definitions .....   | 2           |
| 4                  | Principle .....   | 4           |
| 5                  | Reagents .....  | 4           |
| 6                  | Apparatus .....   | 4           |
| 7                  | Sample preparation .....  | 5           |
| 7.1                | Sample size .....   | 5           |
| 7.2                | Determination of the filling volume .....   | 6           |
| 8                  | Procedure .....   | 7           |
| 8.1                | General .....   | 7           |
| 8.2                | Cleaning of samples .....   | 7           |
| 8.3                | Filling and heating .....   | 8           |
| 8.4                | Analysis of the extraction solutions .....  | 8           |
| 8.5                | Testing to determine whether the containers have been surface treated .....   | 9           |
| 9                  | Expression of results .....   | 9           |
| 9.1                | Calculation .....   | 9           |
| 9.2                | Classification .....  | 9           |
| 9.3                | Distinction between containers of hydrolytic resistance container class HCT 1 and hydrolytic resistance container class HCT 2 ..... | 9           |
| 9.4                | Designation .....   | 10          |
| 10                 | Test report .....   | 10          |
| 11                 | Reproducibility .....   | 11          |
| Bibliography ..... |   | 12          |
