

DIN EN ISO 5361:2013-03 (E)

Anaesthetic and respiratory equipment - Tracheal tubes and connectors (ISO 5361:2012)

Contents		Page
Foreword		3
Introduction		4
1 *Scope		5
2 Normative references		5
3 Terms and definitions		6
4 *General requirements for tracheal tubes and tracheal tube connectors		9
4.1 Risk assessment		9
4.2 Safety		10
5 Specific requirements for tracheal tubes and tracheal tube connectors		10
5.1 Size designation		10
5.2 Dimensions		10
5.3 *Materials		18
5.4 Tracheal tube bevel		19
5.5 *Tracheal tube cuffs		19
5.6 Inflating system for cuffs		20
5.7 Curvature of the tube		20
5.8 *Radiopaque marker		22
5.9 *Kink resistance		22
6 Additional requirement for tracheal tubes with a Murphy eye		23
6.1 Size of the Murphy eye		23
6.2 Location of the Murphy eye		23
6.3 Resistance to kinking or collapse of the Murphy eye		23
6.4 Surface characteristics of the Murphy eye		23
7 Requirements for tracheal tubes with tracheal tube connectors supplied sterile		24
7.1 Sterility assurance		24
7.2 Packaging for tracheal tubes and tracheal tube connectors supplied sterile		24
8 Marking		24
8.1 Use of symbols		24
8.2 Tracheal tubes		20
8.3 Marking on the tracheal tube individual pack or any insert		25
8.4 Marking on tracheal tube connectors		27
Annex A (informative) Rationale		28
Annex B (normative) Determination of cuff diameter		32
Annex C (normative) Test method for cuffed tube collapse		33
Annex D (normative) *Test method for cuff herniation		36
Annex E (informative) Guidance on design of tracheal tube connectors		38

Annex F (informative) Hazard identification for risk assessment	39
Annex G (normative) *Test method for tracheal seal	42
Annex H (normative) Test method to determine kink resistance	45
Bibliography	47
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 93/42/EEC	48
