

ISO/TS 18530:2014-04 (E)

Health Informatics - Automatic identification and data capture marking and labelling - Subject of care and individual provider identification

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Abbreviations		4
5 GS1 specifications and ISO Standards		4
6 Data structures and semantics		4
6.1 Application identifiers		4
6.2 Global service relation number (GSRN)		4
6.3 Service relation instance number (SRIN)		5
7 SoC and Individual Provider identification as a recognized priority		5
7.1 General		5
7.2 Supported processes		6
8 Why globally unique identification?		6
8.1 SoC identification and data processing		6
8.2 Implementation challenges		7
8.3 Symbol placement on identification bands		7
8.4 Individual Provider identification		8
Annex A (informative) Examples of use cases (UC)		9
Bibliography		56
