## Wheelchairs - Part 8: Requirements and test methods for static, impact and fatigue strengths

---

| <b>Contents</b>    |   | <b>Page</b> |
|--------------------|---|-------------|
| Foreword .....     |   | v           |
| Introduction ..... |   | vii         |
| 1                  | Scope .....   | 1           |
| 2                  | Normative references .....                                    | 1           |
| 3                  | Terms and definitions .....                                   | 1           |
| 4                  | Requirements .....  | 2           |
| 4.1                | Strength requirements .....                                   | 2           |
| 4.2                | Disclosure requirements .....                                 | 3           |
| 5                  | Test apparatus .....  | 3           |
| 6                  | Preparation of the test wheelchair .....                      | 13          |
| 6.1                | Setup and adjustment of the wheelchair .....                  | 13          |
| 6.2                | Test dummies .....  | 14          |
| 6.3                | Preparation of wheelchair .....                               | 14          |
| 6.4                | Records .....   | 14          |
| 6.5                | Safety during testing .....                                   | 14          |
| 7                  | Sequence of tests .....                                       | 14          |
| 8                  | Test methods for static strength .....                        | 15          |
| 8.1                | Principle .....   | 15          |
| 8.2                | Wheelchair preparation .....                                  | 15          |
| 8.3                | Selection of loading pad .....                                | 15          |
| 8.4                | Arm supports: Resistance to downward forces .....             | 15          |
| 8.5                | Foot supports: Resistance to downward forces .....            | 16          |
| 8.6                | Tipping levers .....  | 19          |
| 8.7                | Handgrips .....   | 21          |
| 8.8                | Arm supports: Resistance to upward forces .....               | 22          |
| 8.9                | Foot supports: Resistance to upward forces .....              | 24          |
| 8.10               | Push handles: Resistance to upward load .....                 | 27          |
| 8.11               | Scooter steering handles: Resistance to forward forces .....  | 29          |
| 8.12               | Scooter steering handles: Resistance to rearward forces ..... | 30          |
| 8.13               | Scooter steering handles: Resistance to downward forces ..... | 31          |
| 8.14               | Scooter steering handles: Resistance to upward forces .....   | 32          |
| 9                  | Test methods for impact strength .....                        | 33          |
| 9.1                | Principle .....   | 33          |
| 9.2                | Wheelchair preparation .....                                  | 33          |
| 9.3                | Back support: Resistance to impact .....                      | 33          |
| 9.4                | Handrim: Resistance to impact .....                           | 35          |
| 9.5                | Castors: Resistance to impact .....                           | 36          |
| 9.6                | Foot supports: Resistance to impact .....                     | 38          |
| 9.6.1              | General .....   | 38          |
| 9.6.2              | Preparation .....   | 38          |
| 9.6.3              | Lateral impact .....  | 38          |

|   |  |    |
|---|--|----|
| 9.6.4   | Longitudinal impact .....  | 40 |
| 9.7   | Impacts on anti-tip devices .....  | 40 |
| 9.7.1   | Upward impacts on anti-tip devices .....                                 | 40 |
| 9.7.2   | Forward or rearward impacts on anti-tip devices .....                    | 41 |
| 9.7.3   | Lateral impacts on anti-tip devices .....                                | 41 |
| 10  | Fatigue tests .....  | 43 |
| 10.1  | Principle .....  | 43 |
| 10.2  | Preparation of test wheelchair for fatigue tests .....                   | 43 |
| 10.3  | Multi-drum test .....  | 44 |
| 10.3.1  | Test machine settings .....  | 44 |
| 10.3.2  | Manual wheelchair tests .....  | 44 |
| 10.3.3  | Preliminary power measurement for electrically powered wheelchairs ..... | 44 |
| 10.3.4  | Electrical wheelchair tests .....  | 45 |
| 10.4  | Drop test .....  | 46 |
| 10.5  | Fatigue test of manually operated parking brakes .....                   | 48 |
| 11  | Evaluation of test results .....   | 49 |
| 11.1  | Evaluation and records of individual tests .....                         | 49 |
| 11.2  | Evaluation at end of testing .....                                       | 49 |
| 12  | Test report .....  | 49 |
| Annex A (informative) Principles applied to derive static test loads .....                              |  | 51 |
| Annex B (informative) Design considerations .....   |  | 61 |
| Annex C (informative) Derivation of pendulum swing angle for castor and foot support impact tests ..... |  | 62 |
| Annex D (informative) Calculation of pendulum centre of percussion .....                                |  | 65 |
| Bibliography .....  |  | 67 |
