DIN EN ISO 23500:2015-12 (E)

Guidance for the preparation and quality management of fluids for haemodialysis and related therapies (ISO 23500:2014)

Contents

Page

Foreword 4

Introduction 5

1 Scope 6
1.1 General 6
1.2 Inclusions 6
1.3 Exclusions 6

2 Normative references 6

3 Terms and definitions 7

4 Summary of quality requirements of ISO 13958, ISO 13959 and ISO 11663 14
4.1 Dialysis water 14
4.2 Requirements for concentrate 16
4.3 Requirements for dialysis fluid 16
4.4 Record retention 17

5 Critical aspects of system design 17
5.1 Technical aspects 18
5.2 Microbiological aspects 18

6 Validation of system performance 19
6.1 Validation plan 19
6.2 Installation and operational qualification 20
6.3 Performance qualification 21
6.4 Routine monitoring and revalidation 21

7 Quality management 22
7.1 General 22
7.2 Monitoring of fluid quality 22
7.3 Monitoring of water treatment equipment 23
7.4 Monitoring of dialysis water storage and distribution 26
7.5 Monitoring of concentrate preparation 28
7.6 Monitoring of concentrate distribution 28
7.7 Monitoring of dialysis fluid proportioning 28

8 Strategies for microbiological control 29
8.1 General 29
8.2 Disinfection 29
8.3 Microbiological monitoring methods 31

9 Environment 33

10 Personnel 34

Annex A (informative) Rationale for the development and provisions of this International Standard 35

Annex B (informative) Equipment 39

Annex C (informative) Monitoring guidelines for water treatment equipment, distribution systems, and dialysis fluid 57

Annex D (informative) Strategies for microbiological control 62

Annex E (informative) Validation 67

Annex F (informative) Special considerations for home haemodialysis 70

Annex G (informative) Special considerations for acute haemodialysis 76
