DIN EN 80369-5:2017-10 (E)

Small-bore connectors for liquids and gases in healthcare applications - Part 5: Connectors for limb cuff inflation applications (IEC 80369-5:2016 + Cor. 1:2017) (includes Corrigendum :2017)

European foreword 4

Annex ZA (normative) Normative references to international publications with their corresponding European publications 6

Annex ZZ (informative) Relationship between this European standard and the essential requirements of Directive 93/42/EEC [OJ L 169] aimed to be covered 7

Introduction 8

1 * Scope 9

2 Normative references 9

3 Terms and definitions 10

4 General requirements 11
4.1 General requirements for the limb cuff inflation APPLICATION 11
4.2 Materials used for SMALL-BORE CONNECTORS 11
4.3 TYPE TESTS 12

5 Dimensional requirements for sphygmomanometer and cuff SMALL-BORE CONNECTORS 12
5.1 * Requirements for adult or paediatric PATIENT SMALL-BORE CONNECTORS (S1) 12
5.2 Void 12

6 Performance requirements 12
6.1 Air leakage 12
6.2 * Resistance to separation from axial load 12

Annex A (informative) Rationale and guidance 13

A.1 General guidance 13
A.2 Rationale for particular clauses and subclauses 13

Annex B (normative) SMALL-BORE CONNECTORS for the limb cuff inflation APPLICATION 15

Annex C (normative) Reference CONNECTORS 19

C.1 General requirements for reference CONNECTORS 19
C.2 * Sphygmomanometer and cuff S1 reference CONNECTORS 19

Annex D (informative) Assessment of MEDICAL DEVICES and their attributes with CONNECTIONS within this APPLICATION 20

Annex E (informative) Summary of the usability requirements for SMALL-BORE CONNECTORS for limb cuff inflation APPLICATIONS 21

E.1 USER PROFILE 21

E.2 Use scenarios 21
E.3 Use environments and scenarios 22
E.4 Generic USER needs 22

Annex F (informative) Summary of SMALL-BORE CONNECTOR design requirements for limb cuff inflation APPLICATIONS 23

Annex G (informative) Summary of assessment of the design of the CONNECTORS for limb cuff inflation APPLICATION 31

G.1 General 31
G.2 Summary of the engineering analysis of the design 31
G.2.1 NON-INTERCONNECTABLE analysis 31
G.2.2 S1 male to N1 male 31
G.3 Summary of the design VERIFICATION 31
G.4 Summary of the design validation 32
G.5 Summary of the design review 32

Annex H (informative) Obsolete limb cuff inflation CONNECTOR 33

Annex I (informative) Air leakage by pressure decay TEST METHOD 36

I.1 Principle 36
I.2 * Test conditions 36
I.2.1 Test sample preconditioning 36
I.2.2 Environmental test conditions 36
I.3 Apparatus 36
I.4 PROCEDURE 36
I.5 Test report 37

Annex J (informative) Resistance to separation from axial load TEST METHOD 38

J.1 Principle 38
J.2 * Test conditions 38
J.2.1 Test sample preconditioning 38
J.2.2 Environmental test conditions 38
J.3 Apparatus 38
J.4 PROCEDURE 38
J.5 Test report 38

Annex K (informative) Reference to the essential principles 39

Index of defined terms 41
