

ISO 18385:2016-02 (E)

Minimizing the risk of human DNA contamination in products used to collect, store and analyze biological material for forensic purposes - Requirements

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Terms and definitions	2
3	Abbreviated terms	5
4	Types of products	5
4.1	General	5
4.2	Products that come into direct contact with biological stains or material potentially containing human DNA	5
4.3	Chemicals, reagents, solvents, and some disposables involved in the analysis of human DNA	6
4.4	Protective barrier products that are used during the collection and analysis of biological material	6
5	Quality management systems	6
5.1	General	6
5.2	Documents and records	6
5.3	Authorization	7
5.4	Subcontracting of work and purchase of components	7
5.5	Control of nonconforming product	7
5.6	Corrective and preventive action	8
5.7	Staff contamination detection provision	8
6	Human DNA contamination risk management	8
6.1	General	8
6.2	Risk assessment	8
6.3	Risk mitigation	10
6.4	Risk control measures	10
6.4.1	Equipment	10
6.4.2	Personnel	10
6.4.3	Cleaning and maintenance	10
7	Environmental human DNA monitoring	11
8	Requirements for products subject to post-production treatment	11
9	Requirements for products not subject to post-production treatment	12
9.1	Product testing	12
9.2	Batch records	12
10	Product packaging, labelling, and documentation	12
Annex A (normative)	Compliance testing	13
Annex B (informative)	Guidance on the effectiveness of post-production treatments currently used in the manufacture of products	15

Annex C (informative) Relevant markers for DNA profiling	17
Bibliography	18
