ISO 5361:2016-09 (E)

Anaesthetic and respiratory equipment - Tracheal tubes and connectors

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 *General requirements for tracheal tubes and tracheal tube connectors 5
4.1 Risk assessment 5
4.2 Safety 6

5 Specificrequirementsfortrachealtubesandtrachealtubeconnectors 6
5.1 Size designation 6
5.2 Dimensions 6
5.2.1 Tracheal tubes 6
5.2.2 Tracheal tube connectors 10
5.3 *Materials 13
5.4 Tracheal tube bevel 13
5.5 *Tracheal tube cuffs 13
5.6 Inflating system for cuffs 14
5.7 Curvature of the tube 14
5.8 *Radiopaque marker 16
5.9 *Kink resistance 16

6 Additional requirement for tracheal tubes with a Murphy eye 17
6.1 Size of the Murphy eye 17
6.2 Location of the Murphy eye 17
6.3 Resistance to kinking or collapse of the Murphy eye 17
6.4 Surface characteristics of the Murphy eye 17

7 Requirements for tracheal tubes with tracheal tube connectors supplied sterile 17
7.1 Sterility assurance 17
7.2 Packaging for tracheal tubes and tracheal tube connectors supplied sterile 18

8 Marking 18
8.1 Use of symbols 18
8.2 Marking on the tracheal tube 18
8.3 Marking on the tracheal tube individual pack or any insert 19
8.4 Marking on tracheal tube connectors 21

Annex A (informative) Rationale 22

Annex B (normative) Determination of cuff diameter 26

Annex C (normative) Test method for cuffed tube collapse 27

Annex D (normative) *Test method for cuff herniation 30

Annex E (informative) Guidance on design of tracheal tube connectors 32

Annex F (informative)Hazardidentificationforriskassessment 33

Annex G (normative) *Test method for tracheal seal 36

Annex H (normative) Test method to determine kink resistance 39
