Health informatics - Trusted end-to-end information flows

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Abbreviated terms 25

5 Truth, trust, end-to-end information flows and foundations of interoperability 27

6 Trust characteristics in end-to-end information flow 28

7 The trust constituency 29

8 Principles and objectives 32
8.1 Ensured trust 32
8.2 Trust constituency 32
8.3 Health record rights 33
8.4 Health record obligations 33
8.5 Health record composition 34
8.6 Human and business agents and their accountable actions 34
8.7 Software and device agents and their accountable actions 34
8.8 Scope of accountability 34
8.9 Provenance 35
8.10 Authentication 35
8.11 Auditability 36
8.12 Chain of trust 36
8.13 Faithfulness, permanence, persistence and indelibility 36
8.14 Data definition, data registry 36
8.15 Data integrity 36
8.16 Completeness 36

9 Downstream/upstream information flow perspectives 37
9.1 Downstream information flow perspective -- Subject of care 37
9.2 Downstream information flow perspective -- Accountable agent(s) for health record content 38
9.3 Upstream perspective -- Accountable agent(s) for health record access/view 39

10 Agents, actions and corresponding persistent record entries 39
10.1 Agent takes action 39
10.2 Agent documents action taken 40
10.3 Agent stewards the record entry 40

11 Key contexts for action instances and record entry instances 41
11.1 Identity Context 41
11.2 Accountability Context 41
11.3 Data Integrity Context 41
11.4 Clinical Context 41

11.5 Administrative/operational context 42

12 Roles and relationships (examples) 42
12.1 Subject of care and provider relationships 42
12.2 Health services 42
12.3 Health record relationships 42
12.4 Individuals, organizations and business unit relationships 43
12.5 Inter-healthcare professional relationships 43

13 Record lifecycle events and CRUD (create, read, update, delete) 44

14 Key lifecycle events in trusted end-to-end information flows 46

15 Record lifecycle events and action instances 47
15.1 Initial instance 47
15.1.1 Initial action instance 47
15.1.2 Record lifecycle event -- Originate/retain record entry instance(s) 48
15.2 Subsequent instance 50
15.2.1 Subsequent action instance 50
15.2.2 Record lifecycle event -- Amend (update) record entry instance(s) 50
15.3 Record lifecycle event -- Transform/translate 51
15.4 Record lifecycle event -- Attest 52
15.5 Record lifecycle event -- Access/view 53
15.6 Record lifecycle event -- Report (output) 54
15.7 Record lifecycle event -- Disclose 54
15.8 Record lifecycle event -- Transmit 54
15.9 Record lifecycle event -- Receive/retain 56
15.10 Record lifecycle event -- De-identify (anonymize) 57
15.11 Record lifecycle event -- Pseudonymize 58
15.12 Record lifecycle event -- Re-identify 60
15.13 Record lifecycle event -- Extract 61
15.14 Record lifecycle event -- Archive 62
15.15 Record lifecycle event -- Restore (from archive) 63
15.16 Record lifecycle event -- Destroy/delete 64
15.17 Record lifecycle event -- Deprecate 65
15.18 Record lifecycle event -- Reactivate (from delete or deprecate) 66
15.19 Record lifecycle event -- Merge 67
15.20 Record lifecycle event -- Unmerge 68
15.21 Record lifecycle event -- Link 69
15.22 Record lifecycle event -- Unlink 69
15.23 Record lifecycle event -- Add legal hold 70
15.24 Record lifecycle event -- Remove legal hold 71
15.25 Record lifecycle event -- Verify 72
15.26 Record lifecycle event -- Encrypt 73
15.27 Record lifecycle event -- Decrypt 74

Annex A (informative) HL7 Fast Health Interoperable Resources (FHIR) 76

Annex B (informative) Lifecycle metadata captured in FHIR resources 78

Annex C (informative) Sample lifecycle event sequence with FHIR resources 82

Annex D (informative) Lifecycle Event Sequence -- Point of Origination to Point of Access (Example) 84

Bibliography 85
