ISO/TS 20405:2018-05 (E)

Health informatics - Framework of event data and reporting definitions for the safety of health software

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Principles, data concepts and process model 2
4.1 General 2
4.2 Principles 3
4.2.1 General 3
4.2.2 Proactivity 3
4.2.3 Objectivity 3
4.2.4 Accountability 3
4.2.5 Transparency 3
4.2.6 Preparedness 3
4.2.7 Comprehensiveness 4
4.3 Data concepts 4
4.3.1 General 4
4.3.2 Accuracy 4
4.3.3 Timeliness 4
4.3.4 Comparability 4
4.3.5 Usability 4
4.3.6 Relevance 5
4.4 Process model 5
4.4.1 General 5
4.4.2 Recording 5
4.4.3 Analysing 5
4.4.4 Reporting 5

5 Patient safety data elements 6
5.1 General 6
5.2 Event information 6
5.2.1 General 6
5.2.2 Event identification 6
5.2.3 Event date and time 6
5.2.4 Report date 6
5.2.5 Event reporter information 6
5.2.6 Event supplementary information 7
5.3 Event categorization 7
5.4 Event classification 7
5.4.1 General 7
5.4.2 Information input/output errors 8

Annex A (informative) Information on various health software surveillance systems 13

Bibliography 15
