ISO 18472:2018 (E)

Sterilization of health care products — Biological and chemical indicators — Test equipment

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Performance requirements for resistometers

4.1 Intended use
4.2 Test methods
4.3 Air leakage test
4.4 Steam resistometer performance requirements
4.4.1 Measurement accuracy
4.4.2 Data
4.4.3 Process control
4.4.4 General steam resistometer requirements
4.4.5 Air leakage test
4.4.6 Operation of steam resistometer
4.5 Ethylene oxide gas resistometer performance requirements
4.5.1 Measurement accuracy
4.5.2 Data
4.5.3 Process control
4.5.4 General ethylene oxide gas resistometer requirements
4.5.5 Air leakage test
4.5.6 Operation of ethylene oxide gas resistometer
4.6 Dry heat (heated air) resistometer performance requirements
4.6.1 Measurement accuracy
4.6.2 Data
4.6.3 Process control
4.6.4 General dry heat (heated air) resistometer requirements
4.6.5 Operation of dry heat (heated air) resistometer
4.7 Vaporized hydrogen peroxide resistometer performance requirements
4.7.1 Measurement accuracy
4.7.2 Recording interval
4.7.3 Process control
4.7.4 General vaporized hydrogen peroxide resistometer requirements
4.7.5 Air leakage test
4.7.6 Operation of vaporized hydrogen peroxide resistometer

5 Calibration

Annex A (informative) Additional performance characterization — Steam

A.1 General
A.2 Chamber air removal
A.3 Vacuum/pressurization rate
A.4 Range characterization
A.5 Indicator orientation

Annex B (informative) Additional performance characterization — Ethylene oxide gas

B.1 General

B.2 Chamber air removal
B.3 Vacuum/pressurization rate
B.4 Range characterization

Annex C (informative) Additional performance characterization — Dry heat

C.1 General
C.2 Specific variable response
C.3 Range characterization

Annex D (informative) Resistometer documentation and derivations

D.1 General
D.2 Calculation of relative humidity concentration
D.3 Calculation of ethylene oxide gas concentration
D.3.1 General
D.3.2 Calculations
D.3.3 Example calculations/Determining ethylene oxide gas concentration
D.3.4 Derivation of Formula (D.4)
D.4 Documentation
D.4.1 General
D.4.2 Minimum information
